Ajay Venkatesh

Brooklyn, NY

+1 516 585 9013

Education

New York University | *Master of Science in Computer Engineering* ***(GPA – 3.9/4)*** Aug 2024 – May 2026

Experience

PricewaterhouseCoopers (PwC) **Aug 2021 – Aug 2024**

Dynamics 365 and Power Platform Developer

- Developed a **B2B Dynamics 365 app** for customer acquisition and onboarding, including importing external data and visualization using **Power BI**, resulting in a **40%** reduction in onboarding time and a **30%** increase in accuracy of customer journey tracking.
- Created and implemented a customer-facing portal with **live chat functionality (Omnichannel)** to automatically generate cases, contacts, and tasks, which directly reduced manual case entry by **70%** and customer support response time by **25%**.
- Built client and server-side customizations using **JavaScript, plugins, workflows, webhooks**, and **REST APIs** within **Dynamics CRM**, validated end-to-end with **Postman**, lowering query execution time from 1.5s to under 1s (**35% faster** server response).
- Managed end-user accounts, permissions, and security roles on Dynamics 365, developing **6 specific security plans** utilizing **Azure security groups**, achieving **100%** fewer incidents of unauthorized access and optimizing account provisioning time by **50%**.
- Created and implemented custom controls in **Power Apps Component Framework (PCF)** to design reusable UI elements with sophisticated data binding features and responsive design, cutting down redundant UI development work by **60%** and raising user satisfaction ratings by **15%**.
- Orchestrated business-process automation with **Azure Logic Apps**, **Power Automate flows**, and Plugins for validation, notifications, and downstream API integrations, cutting **100K**-record import time from 5 hours to **1 hour** (**80% efficiency gain**) and saving **$15K** annually.
- Combined **5 Power BI dashboard solutions** into portals and applications to analyze data, resulting in a **60%** acceleration of executive decision-making by shortening turnaround on reports from 2 days to real-time.
- Authored Low-Level Architecture for MSDVI On Board across the **SDLC** with **code reviews**, **root cause analysis**, and integration logging/monitoring, deploying through **Azure DevOps** pipelines — cutting production defects by **25%**.
- Developed and customized **Power Portals** using Liquid and web templates, incorporating advanced form functionality and entity permissions, which cut manual configurations by **50%** and optimized portal loading by **20%**.

Amazon **May 2025 – Aug 2025**

Software Development Engineer Intern *Seattle, US*

- Designed a secure UI Console architecture using **Midway SSO, OAuth, and HELIS** to enforce least-privilege, role-based access; presented the solution to the team and received design approval.
- Built serverless infrastructure using **AWS CDK** to deploy API Gateway, Lambda (Java 21), DynamoDB, and S3 with cross-account access; implemented **CI/CD pipeline** for multi-stage deployments.
- Developed a secure, scalable internal console using **React 18** and **Java APIs**, integrating Midway AuthN and HELIS AuthZ for role-based access and improving performance (**40% faster UI, 35% faster APIs**) with reliable unit and integration testing.

New York University **Aug 2024 – May 2025**

Software Developer (On-Campus) *New York, US*

- Contributed to an AI-driven Remote Patient Monitoring System, awarded **$100K** by the National Science Foundation, USA, employing **React Native, TypeScript**, and Cognito authentication for real-time health monitoring.
- Authored parallelized **ETL pipelines** in Python to convert unstructured NoSQL data into structured SQL using **GCP Cloud Functions**, leveraging concurrent processing of data chunks, reducing transformation time by **60%**.
- Developed a React website to host **QuickSight dashboard** handling **50K+** records, utilized **Cognito, Amplify**, and Lambda functions to establish login, role-based access control, and Stripe integration for payment gateway.

Projects

Advanced Expense Tracker (Java Desktop Application) | ***Java, JavaFX, JDBC, SQLite, JFreeChart***

- Architected a modular **Java application** supporting both individual and group expenses with secure login, leveraging **OOP principles** and design patterns **(MVC and DAO)** for separation of concerns.
- Implemented concurrent transaction handling and real-time cost splitting using **multithreading** and synchronized blocks to ensure thread-safe database updates in group expense scenarios.

Skills

Programming Languages: C#, DAX, JavaScript, TypeScript, SQL (T-SQL), Python
Web Development: HTML, CSS, REST APIs, PowerApps, Power Portals, React, Node.js, Express.js, Spring Boot
Database: Dataverse, SQL Server, MySQL, RDBMS, NoSQL, Stored Procedures
Cloud: Azure (Logic Apps, AI Services, Databricks, Function Apps, Storage Blobs, Security Groups)
Tools: Git, Azure DevOps (Pipelines), Postman, Visual Studio, Dynamics CRM 365, ERP, XRM Toolbox, .NET, Power Automate, Power BI
Methodology: Agile, Waterfall
AI/ML: PyTorch, Hugging Face, LLM Fine-tuning, RAG (LangChain, FAISS), NLP, SVM, Random Forest, MLflow, PySpark

Certifications

AWS Certified Cloud Practitioner	Microsoft Azure Data Fundamentals	Azure Data Scientist Associate
Power Platform Fundamentals	Power Platform App Maker Associate	Power Platform Functional Consultant
Power Platform Developer Associate	Power Platform Solution Architect Expert	Power BI Data Analyst Associate
