Ajay Venkatesh

Brooklyn, NY

+1 516 585 9013

Education

New York University | *Master of Science in Computer Engineering* ***(GPA – 3.9/4)*** Sep 2024 – May 2026

- *Coursework:* System Design, Machine Learning, Deep Learning, Big Data, Advanced Java, Data Structures

Skills

Programming Languages: Python, Java, C++, TypeScript, JavaScript (ES6), SQL
Web Technologies: REST API, GraphQL API, Microservices, React, Node.js, Express.js, Sequelize
Database: RDBMS (MySQL, PostgreSQL), NoSQL (Dynamo DB, FireBase, MongoDB), Dataverse
Cloud: AWS (AWS CDK, EC2, S3, Dynamo DB, API Gateway, Lambda, Cognito, IAM, Q, SageMaker), Azure (OpenAI services, Function Apps, Security Data lakes, Storage blobs)
Tools: Git, Visual Studio, Cursor, Jupyter, Postman, Docker, Power Automate, Power BI, QuickSight, Agile, Scrum, Cybersecurity
AI/ML: PyTorch, Hugging Face, LLM Fine-tuning, RAG (LangChain, FAISS), NLP, SVM, Random Forest, MLflow, PySpark

Experience

Campus Mesh **Jan 2026 – Present**
Software Engineer | *Real-time microservices, recommendation engine, and LLM-based AI retrieval pipelines*
– Developed and maintained scalable **Node.js microservices** powering real-time academic workflows for **10K+ users**, including study groups, messaging, notifications, and profile management.
– Built a personalized **recommendation engine** using collaborative filtering and behavioral analytics, increasing user engagement by **28%** and retention by **50%**.
– Authored **LLM-based retrieval pipelines** for CampusIQ (AI Assistant), improving contextual accuracy by **30%** through semantic retrieval and structured data indexing.

Amazon **May 2025 – Aug 2025**
Software Development Engineer Intern | *Serverless AWS infrastructure, React 18 frontend, and Java backend systems*
– Architected a secure UI console for Amazon fulfillment center teams to view image/video evidence across FCs; presented the **system design** for approval and established Role Based Access **(4+ roles)** using **OAuth, Midway SSO, and HELIS**.
– Provisioned **serverless Infrastructure-as-Code** using **AWS CDK** with API Gateway, Lambda, DynamoDB, S3, and IAM, reducing provisioning time by **70%** and enabling **multi-stage, multi-region CI/CD deployments.**
– Built a **React 18** frontend with optimized API integration, advanced filtering, client-side caching, reducing page load time by **40%**.
– Engineered backend services in **Java** using **Coral, Smithy, Dagger**, and **CBOR serialization**; **applied low-level design and design patterns** reduced backend execution time by **35%** and ensure reliability by unit and integration testing using **Mockito**.

New York University (Novel AI Technologies, Inc.) **Aug 2024 – Present**
Software Developer (On-Campus) | *NSF-funded AI health platform, ETL pipelines, and full-stack insurance analytics*
– Architected an **NSF-funded ($100K)** AI-powered health app for **iOS** and **Android**, processing real-time wearable data; deployed cloud-hosted AI models for health metrix analysis and process food images.
– Engineered ETL pipelines transforming **NoSQL** into **PostgreSQL** using **concurrency control and locking mechanisms**; processed **250K+** records and powered **AWS QuickSight** dashboards for real-time health analytics.
– Developed an insurance analytics platform **(React, Node.js, REST APIs)**; deployed **(Docker** containers on **EC2**, implemented Stripe billing, RBAC, and row-level security, generating **$50K+** revenue.
– Streamlined underwriting via broker portal integrated with insurer platform; implemented **document and media processing** and **WebSocket-based real-time communication**; secured **6 insurance clients**.

PricewaterhouseCoopers (PwC) **Aug 2021 – Aug 2024**
Senior Software Engineer | *Cloud-native backend, NLP/OCR automation, and data engineering on Azure*
– Developed a distributed backend on **Microsoft Azure** for a health platform, integrating with **Microsoft CRM** and implementing event-driven processing and fault tolerance.
– Led code reviews and mentored engineers on **software design principles**, reducing production bugs by **25%**.
– Deployed an **NLP** based **OCR neural model** on Azure to automate structured data extraction, reducing data processing time by **75%**.
– Optimized data ingestion with **parallel processing** for **100K**-row from Excel; reduced execution time from **5 hours to 1 hour**.
– Built **Power BI dashboards** processing large datasets from multiple databases, improving reporting efficiency by **40%**.

Projects

Personal Finance Analyzer (Python Data Analysis Project) | ***Python, Pandas, NumPy, Matplotlib, Seaborn***
– Built a data-driven application to analyze personal financial transactions and categorize expenses using **Pandas** for efficient data processing.
– Generated interactive visualizations and spending insights using **Matplotlib** and **Seaborn** to identify trends and optimize budgeting.
– Designed reusable and modular code structure following **OOP principles** to improve maintainability and scalability.

Certifications

AWS Cloud Practitioner	Azure Data Fundamentals	Microsoft Solution Architect Expert
Power BI Data Analyst Associate	Microsoft Developer Associate	Stanford Machine Learning (Coursera)
