Brooklyn, NY | LinkedIn | GitHub | Ph: +1 516 585 9013 | av3855@nyu.edu

EDUCATION

New York University| *Master's in Computer Engineering* *Aug 2024 - May 2026*
Visvesvaraya Technological University | *Bachelors in Electronics and Telecommunication Engineering* (8.9) *Aug 2017 - Aug 2021*

SKILLS

Programming languages: Python, Java, C, C++, JavaScript, SQL.
Web Development: HTML, CSS, JavaScript, React, Bootstrap, Django, Express.js, Node.js, Springboot.
Database: MongoDB, DBMS, SQL, NoSQL, Cosmo DB.
Cloud: Azure (AI services, Logic Apps, Security Data lakes, Function Apps, Storage blobs), AWS (EC2, Lamba, API Gateway, AppSync, QuickSite)
Tools: Azure DevOps, Visual Studio, Jupiter, Dynamics CRM, ERP, Power Automate, Power BI.
AI/ML: Azure open AI, Generative AI, Responsive AI, MLOps, Classification, Pattern Recognition, Data Extraction, LLM.

EXPERIENCE

New York University, NYC, USA
Software Developer, Graduate Assistant, Part-time *August 2024 - Present*
- Developing an AI-driven Remote Patient Monitoring System, funded by the National Science Foundation, USA, employing React Native, CSS, and Firebase authentication for real-time health monitoring.
- Performing an ETL process to extract, transform, and load unstructured JSON data from the Firebase database. The visualisation dashboard is built using AWS Quicksight which improves data analytics by 80%

Price Water House Coopers, SDC (PWC-SDC)
Senior Associate (software developer) *July 2023 - July 2024*
- By analysing business goals, customer needs, and requirements, synthesised solution architecture, product roadmap, and strategy that delivers maximum impact and reduces development time, resulting in product delivery.
- Developed an Azure Cognitive Neural model to extract data from insurance cards, integrated with Power Automate via API, reducing manual data processing time by 75%.
- Leveraged Customer Insights Journey capabilities to generate Marketing emails for campaign journeys targeted towards specific customer segments based on customer behaviour which boosted email open rates by 20% and click-through rates by 15%.
- Implemented Azure CICD pipelines to streamline the solution migration to 3 higher environments, resulting in a 90% decrease in deployment time and improved software development lifecycle.

Associate ***(software developer)*** *Aug 2021 – June 2023*
- Designed 6 'security roles' to control the access and privileges of logged-in users based on hierarchy, ensuring sensitive data protection and eliminating 99% of data breaches.
- Built a B2B web-based application for User Onboarding designed to handle acquisition, creating deals, and onboarding, it has capabilities like external data importing, data visualization using Power BI and tracking.
- Produced and integrated 5 Power BI dashboards with the App. Implemented multi-level data filtering and security rules to access data resulting in a 50% improvement in data visualization and analysis efficiency.
- Developed an automated import flow that reduced the time to clean and import 100 thousand rows of data from Excel into Dataverse from 5 hours to 1 hour, resulting in an 80% increase in efficiency.
- Implementation of CE configurations and customizations (JavaScript, plugins, custom workflows, webhooks, Business rules) to improve the efficiency of the system.
- Created database structure for entity relationships, columns, forms, and views, resulting in a 20% increase in data retrieval efficiency.

PROJECTS

E-commerce store (Cipher) | *HTML, CSS, JavaScript, React, Mongo DB, Node JS*
Created a full-stack e-commerce app with ReactJS, featuring advanced product sorting, wish cart management, and secure Razor pay payments. Implemented persistent login and comprehensive user management with JWT authentication.
Custom CSS Library | *HTML, CSS, Javascript*
Engineered a responsive CSS library with 10+ bootstrap-inspired components, featuring click-to-add functionality, easy integration, customization, and adaptive design for diverse devices. assists in rapid UI development reducing UI development time by 50%.
Automated Classification System for Chronic Kidney Disease | *Machine Learning Models*
This research introduces an Automated Classification System for Chronic Kidney Disease (CKD), which enhances clinical decisions by providing a more accurate, accessible, and efficient diagnosis, ultimately improving patient outcomes.

TRAINING

AI-102: Designing and implementing a Microsoft Azure AI Solution (PWC) »	*May 2024*
Data Science (Cloudy ML) »	*Oct 2022 - Aug 2023*
Machine Learning (Coursera- Stanford) »	*Jan 2022 - Apr 2022*
Microsoft Power Apps, Dynamics 365 training and Azure (PWC) »	*Sep 2021 - Oct 2021*
Data Structures and Algorithms Using Python (NPTEL- IIT Chennai) »	*July 2019 - Sep 2019*

GLOBAL CERTIFICATIONS

App Development	**Data**	**Cloud**
Power Platform App Maker Associate	Power BI Data Analyst Associate	AWS Cloud Practitioner
Power Platform Developer Associate	Azure Data Scientist Associate	Azure Data Fundamentals
Power Platform Solution Architect Expert
