Experience

Amazon

May 2025 – Aug 2025

Software Development Engineer Intern

Seattle, US

- Designed a secure UI Console architecture using **Midway SSO**, **OAuth**, and **HELIS** to enforce least-privilege, role-based access; presented the solution to the team and received design approval.
- Built serverless infrastructure using **AWS CDK (IaC)** to deploy API Gateway, Lambda (Java 21), DynamoDB, and S3 with cross-account access; implemented a **CI/CD pipeline** enabling multi-stage (dev/stage/prod) and multi-region deployments with automated promotion and rollback controls.
- Developed the frontend using **React 18**, integrating AWS UI components, Midway AuthN, and HELIS AuthZ with role-aware views and filtering; delivered a UI that was **40% faster** and significantly more secure than older version.
- Implemented backend APIs using **Java Coral**, **Smithy models**, **Dagger DI**, and CBOR serialization; improved response time by **35%** and ensured reliability through comprehensive unit and integration testing.

New York University

Aug 2024 – May 2025

Software Developer (On-Campus)

New York, US

- Contributed to an AI-driven Remote Patient Monitoring System, awarded **\$100K** by the National Science Foundation, USA, employing **React Native**, **TypeScript**, and Cognito authentication for real-time health monitoring.
- Developed an AI model that identifies food items through mobile images and predicts calorie, protein, and fat intake using **YOLO + OCR** based classification; integrated the model into the app workflow.
- Built parallelized **ETL pipelines** in Python to transform wearable NoSQL data into structured SQL, reducing processing time by **60%**, and visualized health trends using **AWS QuickSight** dashboards.

PricewaterhouseCoopers (PwC)

Aug 2021 – Aug 2024

Senior Associate

- Designed and implemented a **cloud-native distributed backend** on **Microsoft Azure** for a health platform, integrating Microsoft Dynamics for secure data flow and leveraging event-driven Azure services for scalability and fault tolerance.
- Led delivery across design, development, testing, and deployment, coordinating with architects, PMs, and business stakeholders to deliver practical cloud solutions aligned with PwC SDLC and quality standards.
- Modernized a legacy onboarding system by building a scalable **B2B platform** with modular services, migrating core processes to the cloud; integrated data pipelines, email event tracking, and BI reporting, improving automation by **70%**.
- Optimized data pipeline by parallelizing **Excel file imports (100K+ rows)**, cutting processing time from **5 hours to 1** and boosting efficiency by **80%**.
- Designed and deployed an AI solution using **OCR and NLP** on Azure, integrating it into business workflows and delivering production-grade scalability, security controls, and compliance-aligned deployment standards.

Projects

Flight Delay Prediction | *PySpark, HDFS, Random Forest, Gradient Boosted Tree*

- Built a scalable **PySpark ML pipeline** on HDFS to process and engineer features from over **7M flight records** using SQL-based aggregation and anomaly detection.
- Performed extensive EDA to identify delay patterns; trained and optimized **Random Forest and Gradient Boosted Tree** models achieving **85%+** accuracy.
- Converted model outputs into actionable insights, enabling data-driven scheduling and operational planning for delay reduction.

Skills

Programming Languages: C#, Python, Java, C++, JavaScript, SQL

Database: Dataverse, RDBMS, NoSQL

Cloud: Azure (AI Services, Azure AI Foundry, Cognitive Services, Logic Apps, Function Apps, Storage Blobs, Security Data Lakes), AWS (CDK, SDK, EC2, S3, Lambda, IAM, Q, SageMaker)

AI/ML: RAG, MLOps, AI Solution Deployment, Responsible AI, Model Validation & Monitoring

Automation Platforms: Power Automate, Microsoft Copilot Studio, Azure AI Studio

Tools: Git, Docker, Jupyter, Visual Studio, Postman, Power BI, CI/CD Pipelines, QAD, EDI, Transact-SQL

Methodology: Agile, Scrum, SDLC Governance, Test-Driven Development (TDD)

Education

New York University | *Master of Science in Computer Engineering (GPA – 3.9/4)*

Aug 2024 – Aug 2026

Certifications

Azure Data Fundamentals

Power Platform Developer Associate

Power BI Data Analyst Associate

Power Platform Solution Architect Expert

Azure Data Scientist Associate

AWS Cloud Practitioner

Publications

Supervised ML System Based Segmentation and Classification of Stroke Using Deep Learning Techniques (*IEEE*)

An Aquila-optimized SVM classifier for Diabetes prediction (*IEEE*)
