Hiring Manager

San Diego State University

Dear Hiring Manager,

My name is Ajay Venkatesh. I'm finishing my M.S. in Computer Engineering at NYU, with production software experience at PwC in Bengaluru, a summer SDE internship at Amazon, and ongoing on-campus work at NYU's Novel AI Technologies. I'm writing about the Data Scientist (Data Analytics Developer II) role.

At Amazon I provisioned **Infrastructure-as-Code** on **AWS CDK** (Lambda, API Gateway, DynamoDB, IAM, CloudWatch) with multi-stage CI/CD and rollback controls. I shipped backend services in **Java** (Coral, Smithy, Dagger, CBOR) and a **React 18** frontend with optimized API integration. Production work owned end-to-end is the shape of work I want to keep doing.

At NYU's Novel AI Technologies I shipped a customer-facing analytics platform end-to-end with **React**, **Node.js**, **REST APIs**, deployed via **Docker** on **EC2**, with Stripe billing, role-based access, and row-level security for paying clients.

Stack-wise: **Python** for backend and product surfaces, cloud microservices on **AWS** with **Docker** and CI/CD, and PostgreSQL, MySQL, MongoDB, DynamoDB for the data layer. I'm comfortable spanning the stack and reasoning about reliability and safety in customer-facing systems.

What pulls me toward San Diego State University is the seriousness of healthcare and life-science software, where engineering judgment compounds because the work has real consequences for patients and clinicians.

I'd welcome the chance to discuss further. Thanks for considering my application.

Sincerely,

Ajay Venkatesh
