

**Dear Hiring Team at Conair,**

I am excited to apply for the IT Web Developer Intern position at Conair for Summer 2025. As a Master's student in Computer Engineering at New York University, graduating in August 2026, I bring a solid foundation in full-stack web development, backend system design, and collaborative problem-solving, along with hands-on experience from prior roles in dynamic, fast-paced environments.

During my tenure as a Software Developer at NYU, I contributed to an **AI-driven Remote Patient Monitoring System**, where I developed and deployed web applications using React Native and TypeScript for the front-end, and AWS services like Lambda and Cognito for the backend. I also performed data transformations using ETL processes, converting unstructured NoSQL JSON data into structured SQL formats, which highlights my ability to work seamlessly across the full stack.

At PwC, I further honed my backend skills by designing and optimizing serverless database architectures, reducing latency by 20%, and implementing CI/CD pipelines to streamline deployments, resulting in a 90% decrease in deployment times. Additionally, I developed scalable B2B applications by integrating APIs, automating workflows, and implementing data-driven features with PostgreSQL and Python.

Key highlights of my qualifications include:

- **Full-Stack Expertise:** Proficient in front-end technologies (React, JavaScript, CSS, HTML) and backend systems (Node.js, Python, PostgreSQL, AWS Lambda).
- **Backend System Optimization:** Hands-on experience designing and optimizing serverless architectures and integrating REST APIs.
- **Technical Documentation:** Skilled in documenting processes, workflows, and system architectures for knowledge sharing and project transitions.
- **Cloud Computing:** Proficient with AWS services for building scalable, secure, and efficient applications.

I am particularly drawn to this role at Conair because of the opportunity to work closely with senior developers, contribute to impactful projects, and gain hands-on experience with Salesforce Commerce Cloud. I am confident that my technical expertise, coupled with my enthusiasm for problem-solving and collaboration, makes me a strong candidate for this position.

I look forward to the opportunity to bring my skills and experiences to the Conair team. Thank you for considering my application, and I am excited about the possibility of contributing to your innovative projects this summer.

**Best regards,**

Ajay Venkatesh
