SEIMENS

Respected Hiring Manager,

I am excited to apply for the **Strategic Student Program – Associate Software Engineering Intern (Summer 2025)** at **Siemens**. As a **Master's student in Computer Engineering at NYU (GPA: 3.9/4)**, I have developed strong expertise in **software development, cloud computing, and data analytics**, making me a great fit for this role.

In my current role as an **On-Campus Software Engineer at NYU**, I have:

- Developed **full-stack applications** using **React, TypeScript, and Node.js**, integrating RESTful APIs.
- Engineered an **AI-driven Remote Patient Monitoring System**, leveraging AWS for real-time analytics.
- Built **ETL pipelines** to process large-scale unstructured data, using AWS QuickSight for visualization.

Previously, at **PwC as a Senior Software Engineer**, I worked on **scalable software solutions, optimized cloud-based architectures**, and implemented **CI/CD pipelines** to enhance efficiency. My technical expertise includes **Java, Python, PostgreSQL, AWS, Azure, and Docker**.

I am eager to bring my **problem-solving skills and technical expertise** to Siemens. I have attached my resume for your review and would welcome the opportunity to discuss further. Thank you for your time and consideration!

Sincerely,

Ajay Venkatesh

M.S. Computer Engineering, NYU
