Education

New York University <i>Master of Science in Computer Engineering (GPA – 3.9/4)</i>	Aug 2024 – Aug 2026
Visvesvaraya Technological University <i>Bachelors in ECE (GPA – 8.9/10)</i>	Aug 2017 – Aug 2021

Experience

Amazon <i>Software Development Engineer Intern</i> – Designed a secure UI Console architecture using Midway SSO, OAuth, and HELIS to enforce least-privilege, role-based access; presented the solution to the team and received design approval. – Built serverless infrastructure using AWS CDK to deploy API Gateway, Lambda (Java 21), DynamoDB, and S3 with cross-account access; implemented CI/CD pipeline for multi-stage deployments. – Developed the frontend using React 18, integrating AWS UI components, Midway AuthN, and HELIS AuthZ with role-aware views and filtering; delivered a UI that was 40% faster and significantly more secure than older version. – Implemented backend APIs using Java Coral, Smithy models, Dagger DI, and CBOR serialization; improved response time by 35% and ensured reliability through comprehensive unit and integration testing.	May 2025 – Aug 2025 <i>Seattle, US</i>
New York University <i>Software Developer (On-Campus)</i> – Contributed to an AI-driven Remote Patient Monitoring System, awarded \$100K by the National Science Foundation, USA, employing React Native, TypeScript, and Cognito authentication for real-time health monitoring. – Authored parallelized ETL pipelines in Python to convert unstructured NoSQL data into structured SQL using GCP Cloud Functions. Leveraged concurrent processing of data chunks, reducing transformation time by 60%. – Developed a React website to host QuickSight dashboard handling 50K+ records, utilized Cognito, Amplify, and Lambda functions to establish login, role-based access control, and Stripe integration for payment gateway.	Aug 2024 – May 2025 <i>New York, US</i>

PricewaterhouseCoopers (PwC) <i>Senior Software Engineer</i> – Built a distributed backend on Microsoft Azure for a health platform, integrating Microsoft Dynamics for secure data flow and using Azure services for scalability, fault tolerance, and event-driven processing. – Led code reviews and mentored interns on design, TDD, and optimization, reducing bugs by 25% and accelerating CI/CD in an Agile setup. – Developed a scalable B2B platform with modular services to replace legacy onboarding, integrating pipelines, email tracking, and BI reporting, improving automation by 70%. – Deployed a cognitive neural model via REST APIs to extract structured data from physical cards using OCR and NLP, reducing manual effort by 75%. – Implemented RBAC and session validation for 5+ roles, enforcing least-privilege access and preventing unauthorized actions. – Optimized data pipeline by parallelizing Excel file imports (100K+ rows), cutting processing time from 5 hours to 1 and boosting efficiency by 80%.	Aug 2021 – Aug 2024
--	----------------------------

Projects

Advanced Expense Tracker (Java Desktop Application) <i>Java, JavaFX, JDBC, SQLite, JFreeChart</i> – Architected a modular Java application supporting both individual and group expenses with secure login, leveraging OOP principles and design patterns (MVC and DAO) for separation of concerns. – Implemented concurrent transaction handling and real-time cost splitting using multithreading and synchronized blocks to ensure thread-safe database updates in group expense scenarios.

Skills

Programming Languages: Python, Java, C++, JavaScript (ES6), SQL
System Design: High-Level Design (HLD), Low-Level Design (LLD), Scalable Architecture, Design Patterns, Distributed Systems, API Design, Data Modeling
Web Development: REST API, GraphQL API, Microservices, React, Node.js, Express.js, Sequelize
Database: RDBMS (MySQL, PostgreSQL), NoSQL (MongoDB, JSON), Dataverse
Cloud: AWS (AWS CDK, AWS SDK, EC2, S3, Dynamo DB, API Gateway, Lambda, Cognito, IAM, Q, SageMaker), Azure (AI services, Logic Apps, Security Data lakes, Function Apps, Storage blobs)
Tools: Git, Visual Studio, Jupyter, Postman, Docker, Power Automate, Power BI, QuickSight
Methodology: Agile, Waterfall, Scrum

Certifications

AWS Cloud Practitioner	Microsoft Developer Associate	Power BI Data Analyst Associate
Microsoft Solution Architect Expert	Azure Data Scientist Associate	Azure Data Fundamentals

Publications

Supervised ML System Based Segmentation and Classification of Stroke Using Deep Learning Techniques (<i>IEEE</i>)
An Aquila-optimized SVM classifier for Diabetes prediction (<i>IEEE</i>)
