Hiring Team

Talcott Financial Group

Hartford, CT

Dear Hiring Team,

I am writing to express my interest in the Software Engineering Internship position at Talcott Financial Group for Summer 2025. I am currently pursuing a Masters in Computer Engineering at New York University and bring a strong background in software development, data engineering, and business intelligence tools.

As a certified Power BI Data Analyst and experienced software engineer, I have built dashboards and end-to-end data pipelines across multiple cloud platforms. At NYU, I developed a real-time health monitoring system and cloud-based data workflows using Postgres, AWS Lambda, and QuickSight. At PwC, I worked on building scalable data pipelines, optimized SQL queries, and created Power BI dashboards that enhanced reporting capabilities.

I am especially drawn to this opportunity because it offers hands-on work in Power BI, SQL, and React Technologies I am passionate about and have worked with extensively. I enjoy solving problems, collaborating with cross-functional teams, and contributing to impactful solutions.

I would love the opportunity to contribute to Talcott's IT team and support its innovative goals. Thank you for your time and consideration.

Sincerely,

Ajay Venkatesh
