## EDUCATION

|                                       |                                                         |                       |
|---------------------------------------|---------------------------------------------------------|-----------------------|
| New York University                   | Master of Science in Computer Engineering (GPA - 3.9/4) | Graduation - May 2026 |
| Visvesvaraya Technological University | Bachelors in ECE (GPA - 8.9/10)                         | Graduation - Aug 2021 |

## EXPERIENCE

|                               |                    |
|-------------------------------|--------------------|
| New York University, NYC, USA | Aug 2024 - Present |
|-------------------------------|--------------------|

### Data Engineer/Analyst (On-Campus)

- Engineered to an AI-driven Remote Patient Monitoring System, funded by the National Science Foundation, USA, employing React Native, and TypeScript for real-time health monitoring.
- Performed an ETL process to ingest unstructured NoSQL JSON data of 10000+ users into Postgres database using GCP cloud functions. built visualization dashboard in AWS Quick sight and Q to visualize the data.
- Scheduled and automated data pipeline workflows in AWS using event bridge and lambda as trigger to conduct daily cron jobs for the daily final score calculation.

### Price Water House Coopers, (PwC)

#### Senior Technology Consultant

Jul 2023 - Aug 2024

- Developed a scalable data architecture and pipeline roadmap to integrate and centralize diverse data sources for Microsoft Dynamics Health Application, enabling enhanced analytics and decision-making capabilities.
- Designed and deployed a Deep Learning OCR model on Azure ML to automate data extraction from Images and integrate workflows via APIs, reducing manual data entry time and improving accuracy by 75%.
- Streamlined and transformed Postgres and SQL server entities for faster data preprocessing, ensuring high-quality, structured data for machine learning models, improving training efficiency and model accuracy by 30%
- Mentored a team of 5 interns in building and optimizing data pipelines, conducting comprehensive code reviews to reduce errors by 25% and improve deployment cycles in an agile environment.
- Implemented Azure CI/CD pipelines to automate deployment workflows, achieving a 90% reduction in deployment time while ensuring consistent data pipeline operations across higher environments.

#### Associate Technology Consultant

Aug 2021 - Jun 2023

- Developed automated data pipelines to integrate data from 5+ sources into Dataverse, enabling real-time data synchronization and reducing data processing time by 30%.
- Collaborated with the clients to produce Power BI dashboards to monitor, analyze, data, established multi-level data filtering and security rules to access data, improving in data visualization and analysis efficiency.
- Improved an automation flow used to clean, map and import 100K rows of data from Excel file to Database from 5 hours to 1 hour, resulting in an 80% increase in efficiency.
- Designed and implemented a MySQL database to securely store sensitive client data, reducing unauthorized access risks by 40% through role-based access controls and encryption.
- Established a robust version control system using git in pipeline projects at PwC; streamlined workflows resulted in a reduction of integration issues encountered during deployments by over 25%.

## PROJECTS

### Executive Performance Analytics Dashboard

- Architected a data pipeline using Power Automate to process and transform quarterly, monthly, and yearly reports, ensuring seamless data ingestion and transformation for analysis in Power BI.
- Generated interactive dashboards in Power BI and Canvas Apps, enabling directors to analyze key business metrics, track trends, and gain actionable insights from structured reports, enhancing reporting efficiency by 30%.

### Hospital Management System

- Streamlined the process of aggregating patient and appointment records through Microsoft's cloud solutions which facilitated faster retrieval times—reducing average report generation time from one hour down to fifteen minutes.

## SKILLS

**Programming languages:** Python, Java, JavaScript, SQL, C#.

**Database:** RDBMS (MySQL, PostgreSQL), NoSQL (MongoDB, JSON).

**Cloud:** AWS (S3, Amplify, Lambda Function, API Gateway, Cognito, QuickSight, Q, SageMaker) **Azure** (AI Services, Databricks, Storage blobs).

**Tools:** Git, Azure DevOps, Hadoop, Power Automate, Power BI, Tableau. Apache, Spark, Adobe.

**Methodology:** Agile, Waterfall.

**AI/ML:** Machine Learning, Deep Learning, Big Data, ML-Ops, Principal component analysis.

## CERTIFICATIONS

|                                 |                                          |                                    |
|---------------------------------|------------------------------------------|------------------------------------|
| Power BI Data Analyst Associate | Azure Data Fundamentals                  | Azure Data Scientist Associate     |
| AWS Cloud Practitioner          | Power Platform Solution Architect Expert | Power Platform Developer Associate |

## TRAININGS

|                                                                        |                     |
