EDUCATION

New York University <i>Master of Science in Computer Engineering (GPA - 3.9/4)</i>	<i>Graduation - May 2026</i>
Visvesvaraya Technological University <i>Bachelors in ECE (GPA - 8.9/10)</i>	<i>Graduation - Aug 2021</i>

SKILLS

Programming languages: Python, JavaScript, SQL, C#.
Database: RDBMS (MySQL, PostgreSQL), NoSQL (MongoDB, JSON).
Cloud: AWS (EC2, S3, Amplify, Lambda Function, API Gateway, Cognito, IAM, AppSync, QuickSight, Q, SageMaker) **Azure** (AI services, Logic Apps, Databricks, Function Apps, Storage blobs, Security Groups).
Tools: Git, Azure DevOps, Visual Studio, Power Automate, Power BI, Tableau. Apache.
Methodology: Agile, Waterfall.
AI/ML: Classification, Pattern Recognition, Data Extraction, ML-Ops, Neural Network, PCA, LLM.

EXPERIENCE

New York University, NYC, USA	<i>Aug 2024 - Present</i>
--------------------------------------	---------------------------

Data Engineer/Analyst (On-Campus)

- Engineered to an AI-driven Remote Patient Monitoring System, funded by the National Science Foundation, USA, employing React Native, TypeScript for real-time health monitoring.
- Performed an ETL process to ingest unstructured NoSQL JSON data of 10000+ users into Postgres database using GCP cloud functions. built visualization dashboard in AWS Quick sight and Q to visualize the data.
- Scheduled and automated data pipeline workflows in AWS using event bridge and lambda as trigger to conduct daily cron job for the daily final score calculation.

Price Water House Coopers, (PwC)

Senior Technology Consultant

Jul 2023 - Aug 2024

- Developed a scalable data architecture and pipeline roadmap to integrate and centralize diverse data sources for Microsoft Dynamics Health Application, enabling enhanced analytics and decision-making capabilities.
- Designed and deployed a Deep Learning OCR model on Azure ML to automate data extraction from Images and integrate workflows via APIs, reducing manual data entry time and improving accuracy by 75%.
- Streamlined and transformed Postgres and SQL server entities for faster data preprocessing, ensuring high-quality, structured data for machine learning models, improving training efficiency and model accuracy by 30%
- Mentored a team of 5 interns in building and optimizing data pipelines, conducting comprehensive code reviews to reduce errors by 25% and improve deployment cycles in an agile environment.
- Implemented Azure CI/CD pipelines to automate deployment workflows, achieving a 90% reduction in deployment time while ensuring consistent data pipeline operations across higher environments.

Associate Technology Consultant

Aug 2021 - Jun 2023

- Developed automated data pipelines to integrate sei structured data from 5+ sources into Dataverse, enabling real-time data synchronization and reducing data processing time by 30%.
- Collaborated with the clients to produce Power BI dashboards to monitor, analyze, data, established multi-level data filtering and security rules to access data, improving in data visualization and analysis efficiency.
- Improved an automation flow used to clean, map and import 100K rows of data from Excel file to Database from 5 hours to 1 hour, resulting in an 80% increase in efficiency.
- Designed and implemented a MySQL database to securely store sensitive client data, reducing unauthorized access risks by 40% through role-based access controls and encryption.
- Utilized git for version control and collaborative development of data pipelines at PwC, ensuring code integrity, reducing deployment errors, and streamlining team workflows.

PROJECTS

Executive Performance Analytics Dashboard

- Architected a data pipeline using Power Automate to process and transform quarterly, monthly, and yearly reports, ensuring seamless data ingestion and transformation for analysis in Power BI.
- Generated interactive dashboards in Power BI and Canvas Apps, enabling directors to analyze key business metrics, track trends, and gain actionable insights from structured reports, enhancing data-driven decision-making.

Hospital Management System

- Implemented a Microsoft ERP system to manage Appointments, Patient and Doctor records, Lab Reports and Medical History.
- Leveraged Microsoft Dataverse as database, Azure for Security and API integration, Power BI for analytics and reporting.

CERTIFICATIONS

Power BI Data Analyst Associate	Azure Data Fundamentals	Azure Data Scientist Associate
AWS Cloud Practitioner	Power Platform Solution Architect Expert	Power Platform Developer Associate

TRAININGS

AI-102: Designing and implementing a Microsoft Azure AI Solution (PWC)	<i>Apr 2022 - May 2024</i>
Microsoft Power Apps, Power BI training and Azure (PWC) »	<i>Jan 2022 - Apr 2022</i>
