EDUCATION		
New York University Master of Science in Computer Engineering (GPA - 3.9/4)		Graduation - May 2026
EXPERIENCE		
New York University, NYC, USA		Aug 2024 - Present
Software Engineer (On-Campus)		
- Engineered to an AI-driven Remote Patient Monitoring System, funded by the National Science Foundation, USA, employing React Native, TypeScript for real-time health monitoring. Secured a total of \$110,000 in non-equity funding and applied to YC. - Performed an ETL process to convert unstructured NoSQL JSON data into structured SQL data using GCP Python cloud functions. Built a visualization dashboard in AWS QuickSight, which improves data analytics by 30%. - Developed and deployed a React website with an embedded QuickSight dashboard, hosted using AWS S3 and CloudFront Utilized Cognito, Amplify, and Lambda functions to establish login, role-based access control, and backend functionality.		
Price Water House Coopers, (PwC)		
Senior Software Engineer		Jul 2023 - Aug 2024
- Analyzed business goals and customer requirements to synthesize a comprehensive product roadmap and solution architecture for the B2B Health Application. - Constructed a Cognitive Neural model to extract data from cards, integrated with Power Automate via API, reducing manual data processing time by 75%. - Mentored 5 interns, conducted thorough code reviews for a team, reducing bug occurrences by 25% and enabling a faster deployment cycle, aligning with agile methodologies. - Engineered and optimized serverless database structure that improved data storage, retrieval, and processing workflows; achieved a 20% reduction in latency across diverse digital environments for seamless operations. - Implemented Azure CI/CD pipelines to streamline the solution migration to 3 higher environments, resulting in a 90% decrease in deployment time and enhanced software development lifecycle.		
Associate Software Engineer		Aug 2021 – Jun 2023
- Designed 6 targeted security protocols using security groups that ensured appropriate control over logged-in users’ privileges by assessing role hierarchies: fortifying data protection measures while eliminating virtually all instances of unauthorized access. - Built a cloud-based application for handling acquisition, creating deals, and onboarding, with capabilities like external data importing, data visualization using Power BI, and Email-tracking. - Produced and integrated 5 Power BI dashboards to monitor and analyze data, established multi-level data filtering and security rules to access data, improving data visualization and analysis efficiency. - Optimized an ETL process to clean, map, and import 100K rows of data from an Excel file to the Database from 5 hours to 1 hour, resulting in an 80% increase in efficiency with Python data pipelines. - Composed client and server-side custom configurations for applications using JavaScript, plugins, custom workflows, webhooks, and Business rules yielding a 35% faster server response.		
PROJECTS		
Personal Expense Tracker (Java Desktop Application) (Java, JavaFX, SQL)		
- Developed a Java-based desktop app to manage individual expenses with secure login, expense categorization, and monthly summaries. - Enabled data visualization using JFreeChart and ensured persistence through SQLite with CSV export functionality.		
Hospital Management System (Full Stack)		
- Designed a React application to manage Appointments, Patient and Doctor records, Lab Reports and Medical History. - Implemented MySQL data consistency measures via triggers and stored procedures, reducing anomalies by 50% and enhancing performance by 40%.		
E-commerce store (Full Stack)		
Created a React JS shopping website, securing user data with AWS Cognito and processed payments via Lambda functions, DynamoDB for data storage, and used AWS S3 for multimedia content.		
SKILLS		
Programming languages: Python, Java, JavaScript, TypeScript, SQL.		
Web Development: HTML, CSS, ReactJS, Restful API, Node.js, Bootstrap, Express.js, Sequelize.		
Database: RDBMS (MySQL, PostgreSQL), NoSQL (MongoDB, JSON).		
Cloud: Azure (AI services, Logic Apps, Databricks, Function Apps, Storage blobs) AWS (EC2, S3, Amplify, Lambda Function, API Gateway, Cognito, IAM, AppSync, QuickSight) GCP (cloud function, Firestore, BigQuery).		
Tools: DevOps, Visual Studio, Git, Eclipse, Docker, XRM Toolbox, Power BI, Tableau.		
Software Development Life Cycle: Agile Methodology, Waterfall.		
CERTIFICATIONS		
Power BI Data Analyst Associate	AWS Cloud Practitioner	Azure Data Fundamentals
Microsoft Developer Associate	Azure Data Scientist Associate	Microsoft Solution Architect Expert
TRAININGS		
AI-102: Designing and implementing a cloud-based AI Solution (PWC) »		May 2024
Data Structures and Algorithms Using Python (NPTEL IIT Chennai) »		Jul 2019 - Sep 2019
