Hiring Manager

Clearwater Analytics

New York, NY

Dear Hiring Manager,

I'm Ajay Venkatesh, completing an M.S. in Computer Engineering at NYU, with production software experience at PwC in Bengaluru, a summer SDE internship at Amazon, and ongoing on-campus work at NYU's Novel AI Technologies. I'm applying for the Software Development Engineer role at Clearwater Analytics, where I'd contribute backend services, dependable integrations, and quality-focused delivery for analytics software.

At Amazon, I engineered backend services in **Java** using **Coral**, **Smithy**, **Dagger**, and **CBOR serialization**, with unit and integration coverage via **Mockito**. I also provisioned **serverless Infrastructure-as-Code** with **AWS CDK**, **API Gateway**, **Lambda**, and **DynamoDB**, and supported multi-stage **CI/CD** releases. That work maps closely to building maintainable services, documented APIs, and tested deployments.

At NYU's Novel AI Technologies, I built **ETL pipelines** from **NoSQL** into **PostgreSQL** with concurrency controls and powered **AWS QuickSight** dashboards. I also shipped an insurance analytics platform with **React**, **Node.js**, **REST APIs**, and **Docker** on **EC2**, which gave me practical exposure to data-heavy workflows and regulated customer-facing software.

My day-to-day stack spans **Python**, **Java**, **C#**, **C++**, **TypeScript**, **React**, **Node.js**, **AWS**, **Docker**, **SQL**, **Git**, and **microservices**. I've used these tools across internships and production roles, and I'm comfortable picking up new frameworks when a team's codebase calls for it.

What pulls me toward Clearwater Analytics is the chance to write software where accuracy and reliability directly affect institutional investment decisions. Based here in Brooklyn, I'd welcome working onsite with your New York team on analytics products that institutions depend on every day.

I'd welcome the chance to discuss further. Thanks for considering my application.

Sincerely,

Ajay Venkatesh
