

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Machine Learning, Deep Learning, Big Data, Data Structures

Experience

- Amazon** May 2025 – Aug 2025
Software Development Engineer Intern
Seattle, US
 - Built unit, integration, and automated system test coverage for backend services in **Java** using **Mockito**; integrated tests into **multi-stage, multi-region CI/CD** pipelines via **AWS CDK**.
 - Provisioned **serverless Infrastructure-as-Code** with API Gateway, Lambda, DynamoDB, S3, and IAM; reduced provisioning time **70%** and improved release confidence through repeatable deployment workflows.
 - Collaborated with testers to reproduce and resolve defects; built a **React** internal console with optimized API integration, filtering, and caching for debugging operational issues across fulfillment centers.
 - Engineered backend services (Coral, Smithy, Dagger, CBOR) with **low-level design patterns**, cutting backend execution time by **35%** while maintaining testable service boundaries.
- CampusMesh** Jan 2026 – Present
Software Engineer
New York, US
 - Developed scalable **Python/Node.js microservices** for distributed academic workflows, backed by **MySQL** and **DynamoDB**, with validation across **4 environments** (local, dev, staging, production).
 - Deployed **serverless architecture** on **AWS** (Lambda, API Gateway, S3, CloudFront) using **Serverless Framework**; enforced security with **KMS, SSM Parameter Store**, and least-privilege **IAM**.
- New York University (Novel AI Technologies, Inc.)** Aug 2024 – Present
Software Developer
New York, US
 - Engineered **Python/ETL pipelines** transforming **NoSQL** into **PostgreSQL** with **concurrency control and locking**; built data validation checks before powering **AWS QuickSight** dashboards.
 - Developed an analytics platform (**React, Node.js, REST APIs**) deployed via **Docker** on **Linux/EC2**; implemented RBAC and row-level security for production users.
- PricewaterhouseCoopers (PwC)** Aug 2021 – Aug 2024
Senior Software Engineer
Bengaluru, India
 - Developed a distributed backend on **Microsoft Azure** with asynchronous message processing and fault-tolerant retries; diagnosed production incidents across multi-service flows via logs and metrics.
 - Led code reviews and mentored engineers on **software design principles**, reducing production bugs by **25%**; optimized bulk ingestion pipelines with parallel execution on **100K-row** datasets.

Projects

- InviLite (Incident Analysis Pipeline)** | *Python, AWS, Lambda, S3, Glue, DynamoDB, FAISS*
 - Architected a cloud-native **Python data pipeline** (Kinesis, Lambda, S3, Glue, DynamoDB) with governed ingestion and automated evaluation workflows for structured and unstructured enterprise data.
 - Built a **RAG system** (SVM + FAISS + Bedrock LLM) with measurable classification improvements, supporting failure analysis and root-cause triage workflows.
- Advanced Expense Tracker (Python Desktop Application)** | *Python, Tkinter, SQLite3, unittest, Pandas*
 - Architected a modular **Python application** with **unittest** coverage, **OOP/MVC patterns**, and thread-safe **SQLite3** writes using locks for concurrent transaction handling.

Skills

- Programming Languages:** Python, Java, TypeScript, JavaScript (ES6), SQL, C++
- Web & Backend:** Node.js, Express.js, REST API, Microservices, React, GraphQL
- Databases:** PostgreSQL, MySQL, DynamoDB, MongoDB
- Cloud & DevOps:** AWS (CDK, Lambda, EC2, S3, API Gateway, DynamoDB, IAM), Docker, Kubernetes, CI/CD, Linux
- Testing & Tools:** Mockito, JUnit, unittest, Git, Cursor, GitHub Copilot, Postman, Visual Studio

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals
