

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Machine Learning, Deep Learning, Big Data, Advanced Java, Data Structures

Experience

- Amazon** May 2025 – Aug 2025
Software Development Engineer Intern
Seattle, US
 - Engineered backend services in **Java** (Coral, Smithy, Dagger, CBOR); applied **OOP design patterns** and multi-tier service architecture with unit/integration testing via **Mockito** and **CI/CD** releases.
 - Built a **React** frontend with **TypeScript** and **REST API** integration, client-side caching, and **OAuth** access controls for internal back-office users.
 - Provisioned **serverless Infrastructure-as-Code** using **AWS CDK** with API Gateway, Lambda, DynamoDB, S3, and IAM across multi-stage deployments.
- New York University (Novel AI Technologies, Inc.)** Aug 2024 – Present
Software Developer
New York, US
 - Developed an insurance analytics platform (**React**, **Node.js**, **TypeScript**, **REST/CRUD APIs**) on **Docker/EC2**; implemented Stripe billing, **RBAC**, and row-level security for regulated customer workflows.
 - Engineered **ETL pipelines** transforming **NoSQL** into **PostgreSQL** with **concurrency control and locking**; powered **AWS QuickSight** dashboards for operational reporting.
 - Streamlined underwriting via a broker portal with **WebSocket-based real-time communication**, **HTML/CSS/JavaScript** interfaces, and SaaS integrations across insurer platforms.
- CampusMesh** Jan 2026 – Present
Software Engineer
New York, US
 - Developed scalable **Node.js microservices** with **TypeScript** backed by **MySQL (Sequelize)** and **DynamoDB (NoSQL)** for consumer-facing academic workflows.
 - Deployed **serverless architecture** on **AWS** (Lambda, API Gateway, S3, CloudFront) with **KMS**, **SSM Parameter Store**, and least-privilege **IAM**.
- PricewaterhouseCoopers (PwC)** Aug 2021 – Aug 2024
Senior Software Engineer
Bengaluru, India
 - Developed a distributed backend on **Microsoft Azure** integrating with **Microsoft CRM** and **SQL Server**; implemented asynchronous processing and fault-tolerant retries for enterprise health workflows.
 - Led code reviews and mentored engineers on **software design principles**; optimized bulk **ETL-style ingestion** of large Excel feeds with parallel execution.

Projects

- Advanced Expense Tracker (Java Desktop Application)** | *Java, JDBC, Maven, SQLite, JavaFX, OOP, MVC*
 - Architected a modular **Java application** with **JDBC**, **MVC/DAO patterns**, and **Maven** build tooling; implemented **multithreading** and synchronized blocks for thread-safe **CRUD** database operations.
- Hospital Management System (Full-Stack Web Application)** | *React, TypeScript, Node.js, Express, MongoDB, HTML, CSS*
 - Built a **full-stack platform** (**React**, **Node.js**, **Express**, **MongoDB**) with **REST endpoints**, relational and document data models, and responsive **HTML/CSS** interfaces.

Skills

- Programming Languages:** Java, Python, TypeScript, JavaScript (ES6), SQL, C++
- Web & Backend:** React, Node.js, Express.js, REST/CRUD APIs, Microservices, HTML, CSS, JSON, Maven, Sequelize
- Databases:** PostgreSQL, MySQL, SQL Server, MongoDB, DynamoDB, JDBC
- Cloud & DevOps:** AWS (CDK, EC2, S3, Lambda, API Gateway, DynamoDB, IAM), Azure, Docker, Kubernetes, CI/CD, Linux
- Tools & Platforms:** Git, OAuth, Cursor, GitHub Copilot, JUnit, Mockito, Postman, Visual Studio

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals

Stanford Machine Learning (Coursera)
