Hiring Manager

Notion

San Francisco, CA

Dear Hiring Manager,

I'm Ajay Venkatesh, completing an M.S. in Computer Engineering at NYU, with production software experience at PwC in Bengaluru, a summer SDE internship at Amazon, and ongoing on-campus work at NYU's Novel AI Technologies. I'm applying for the Software Engineer, New Grad role at Notion, where I'd help plan, build, and maintain product features that reach a large audience through thoughtful full-stack engineering.

At NYU's Novel AI Technologies, I developed an insurance analytics platform with **React**, **Node.js**, **TypeScript**, and **REST APIs**, deployed via **Docker** on **EC2** with **PostgreSQL** data pipelines and **RBAC**. I also built **WebSocket-based real-time communication** for a broker portal, which maps closely to shipping polished user experiences backed by reliable backend systems.

At Amazon, I built a **React** frontend with **TypeScript**, optimized API integration, and client-side caching to improve performance and reliability for internal users. At CampusMesh, I develop **Node.js microservices** with **TypeScript** and **MySQL**, including semantic search features that support user onboarding and in-product help flows.

My stack spans **TypeScript**, **JavaScript**, **Node.js**, **Python**, **React**, **HTML**, **CSS**, **PostgreSQL**, **MySQL**, **MongoDB**, **AWS**, **Docker**, and **Git**. I use **Cursor** and **GitHub Copilot** pragmatically in day-to-day development. **Elasticsearch** is the one item I have not shipped in production yet, but I have picked up new backend tools quickly on prior internships and projects.

What pulls me toward Notion is the chance to build collaborative software where small product decisions compound into how teams think, plan, and share knowledge. I care about technology that stays oriented toward real user outcomes, and I'd welcome contributing onsite in San Francisco after graduation.

I'd welcome the chance to discuss further. Thanks for considering my application.

Sincerely,

Ajay Venkatesh
