

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Machine Learning, Deep Learning, Big Data, Data Structures

Experience

- Amazon

May 2025 – Aug 2025

Software Development Engineer Intern

Seattle, US

- Engineered backend services in **Java** (Coral, Smithy, Dagger, CBOR) within a **microservice architecture**; wrote new application code and enhanced existing services with unit/integration test automation via **Mockito**.
 - Provisioned **serverless Infrastructure-as-Code** using **AWS CDK** with API Gateway, Lambda, DynamoDB, S3, and IAM; supported **multi-stage CI/CD** deployments for mission-critical internal workflows.
 - Built a **React/Node.js** internal console with optimized API integration for real-time operational visibility; collaborated cross-functionally with product and engineering partners.
- PricewaterhouseCoopers (PwC)

Aug 2021 – Aug 2024

Senior Software Engineer

Bengaluru, India

- Modernized a legacy enterprise health platform into a **distributed microservice-style backend** on **Microsoft Azure**, integrating with **Microsoft CRM** and **SQL Server** with asynchronous processing and fault-tolerant retries.
 - Resolved workflow bottlenecks through **automation optimization**, including **NLP-based OCR** pipelines that replaced manual document extraction, reducing processing time by **75%**.
 - Led peer code reviews and mentored engineers in an **Agile** delivery environment; diagnosed production incidents across multi-service flows.
- CampusMesh

Jan 2026 – Present

Software Engineer

New York, US

- Developed **Python/Node.js microservices** for real-time academic workflows (messaging, notifications, calls), backed by **MySQL** and **DynamoDB** in a **microservice architecture**.
 - Deployed containerized services on **Linux/AWS** (Lambda, API Gateway, S3) with **Docker**-compatible serverless patterns and least-privilege **IAM** security controls.
- New York University (Novel AI Technologies, Inc.)

Aug 2024 – Present

Software Developer

New York, US

- Engineered **Python ETL pipelines** and **REST API services** transforming **NoSQL** into **PostgreSQL**; deployed workloads via **Docker** on **Linux/EC2** for production analytics.

Projects

- InviLite (Real-Time Data Processing Pipeline) | Python, AWS, Kinesis, Lambda, DynamoDB, S3

- Architected a cloud-native ingestion and processing pipeline with **real-time event flows** (Kinesis, Lambda, S3, Glue, DynamoDB) for structured and unstructured operational data.
- Hospital Management System (Full-Stack Application) | React, JavaScript, Node.js, Express, MongoDB

- Built **source code** for a full-stack platform with **REST APIs**, automated test coverage, and role-based access control for operational data management.

Skills

- Programming Languages:** Java, Python, Go, JavaScript (ES6), TypeScript, C++, SQL
- Web & Backend:** Node.js, React, REST API, Microservices, Express.js
- Databases:** PostgreSQL, MySQL, SQL Server, DynamoDB, MongoDB
- Cloud & DevOps:** AWS (CDK, Lambda, EC2, S3, API Gateway, DynamoDB), Azure, Docker, Kubernetes, CI/CD, Linux
- Tools & Platforms:** Git, Mockito, JUnit, Cursor, GitHub Copilot, Postman

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals
