

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: Machine Learning, Deep Learning, Big Data, System Design, Data Structures

Experience

• CampusMesh

AI Software Engineer

Jan 2026 – Present

New York, US

- Built **CampusIQ**, a **conversational AI copilot** with **LLM-based RAG pipelines**, **embedding-based semantic search**, and structured data indexing to support student-facing workflows across messaging, study groups, and academic operations.
- Shipped **full-stack features** (**React**, **Node.js**, **TypeScript**, **REST APIs**) used daily by campus teams; replaced manual coordination with purpose-built tools backed by **MySQL** and **DynamoDB**.
- Deployed **serverless infrastructure** on **AWS** (Lambda, API Gateway, S3, CloudFront) across local through production environments; prototyped and iterated rapidly using **Cursor** and **AI-assisted development** workflows.

• Amazon

Software Development Engineer Intern

May 2025 – Aug 2025

Seattle, US

- Deployed a **RAG pipeline** with an **agentic workflow** that retrieves operational logs and generates context-aware remediation steps for internal incident triage.
- Implemented a custom **Model Context Protocol (MCP) server** for tool-augmented retrieval, cutting AWS Athena query time and compute costs by **40%**.
- Built a **React** internal console and **REST API** services on **AWS CDK/ECS**; shipped features through **CI/CD** with cross-functional product and engineering partners.

• New York University (Novel AI Technologies, Inc.)

AI Software Engineer

Aug 2024 – Present

New York, US

- Developed a **full-stack insurance analytics platform** (**React**, **Node.js**, **REST APIs**) with **LLM-based document analysis (GPT-4 + LangChain)** to replace manual underwriting review steps for operations teams.
- Built **operational dashboards** via **AWS QuickSight** and **ETL pipelines (Python, PostgreSQL)** powering analytics for internal stakeholders; deployed services with **Docker** on **EC2**.

• PricewaterhouseCoopers (PwC)

Senior Software Engineer

Aug 2021 – Aug 2024

Bengaluru, India

- Built an **NLP-powered OCR automation pipeline** on **Azure** to replace manual document extraction for operations teams, reducing processing time by **75%**.
- Developed a distributed backend integrating with **Microsoft Dynamics**; partnered with internal teams to ship workflow improvements in a fast-paced delivery environment.

Projects

• InviLite (AI Operations & Analytics Platform) | Python, AWS, Bedrock, FAISS, LangChain, SageMaker

- Built a **RAG copilot** (SVM + FAISS + **Bedrock LLM**) for incident triage and root-cause analysis, lifting classification accuracy from **56% to 92%** with automated evaluation workflows.

• RoBERTa Fine-Tuning with Custom LoRA | Python, PyTorch, Hugging Face, PEFT

- Architected a **parameter-efficient fine-tuning** pipeline with custom **LoRA** for text classification; achieved **83.45%** accuracy with under **1M trainable parameters**.

Skills

- **Programming Languages:** Python, TypeScript, JavaScript (ES6), Java, SQL
- **AI/ML & Workflows:** RAG, LangChain, FAISS, LLM Fine-tuning, Agentic AI, MCP, PyTorch, Hugging Face, NLP, Embeddings
- **Full-Stack:** React, Node.js, Express.js, REST API, Microservices, Dashboard Development
- **Databases:** PostgreSQL, MySQL, DynamoDB, MongoDB
- **Cloud & DevOps:** AWS (Lambda, Bedrock, ECS, S3, CDK, QuickSight), Docker, CI/CD, Azure
- **AI-Assisted Development:** Cursor, GitHub Copilot, Claude, OpenAI, Git, Postman

Certifications

AWS Cloud Practitioner

Stanford Machine Learning (Coursera)

Azure Data Fundamentals
