Hiring Manager

CarGurus

Dear Hiring Manager,

I'm Ajay Venkatesh, completing an M.S. in Computer Engineering at NYU, with production software experience at PwC in Bengaluru, a summer SDE internship at Amazon, and ongoing on-campus work at NYU's Novel AI Technologies. I'm applying for the Software Engineer II role at CarGurus, where I'd develop and deploy analytics and data products that support dealer-facing experiences with strong architecture and performance standards.

At Amazon, I engineered backend services in **Java** (Coral, Smithy, Dagger, CBOR) with **Mockito** test coverage and built a **React** frontend with **JavaScript** and client-side caching to improve performance for internal users. I also provisioned **AWS CDK** infrastructure with **Lambda**, **DynamoDB**, and **CI/CD** pipelines, which maps closely to shipping well-tested code on **AWS** with measurable quality.

At NYU's Novel AI Technologies, I developed an analytics platform with **React**, **JavaScript**, and **REST APIs**, plus **SQL/ETL pipelines** into **PostgreSQL** and **AWS QuickSight** dashboards for stakeholder reporting. At CampusMesh, I build **distributed microservices** on **AWS** backed by **MySQL** and **DynamoDB**, collaborating across environments from local through production.

My stack includes **Java**, **JavaScript**, **React**, **SQL**, **PostgreSQL**, **MySQL**, **AWS**, **microservices**, **Docker**, **Git**, **Cursor**, and **GitHub Copilot**. I hold an **AWS Cloud Practitioner** certification and am comfortable iterating on features independently while partnering with product and analytics stakeholders.

What pulls me toward CarGurus is the chance to build data products where engineering quality directly shapes trust and transparency in a large automotive marketplace. I'd welcome contributing to dealer-facing analytics systems that combine solid **Java** and **React** engineering with reliable cloud delivery.

I'd welcome the chance to discuss further. Thanks for considering my application.

Sincerely,

Ajay Venkatesh
