Hiring Manager

Discord

Dear Hiring Manager,

I'm Ajay Venkatesh, completing an M.S. in Computer Engineering at NYU, with production software experience at PwC in Bengaluru, a summer SDE internship at Amazon, and ongoing on-campus work at NYU's Novel AI Technologies. I'm applying for the backend infrastructure role at Discord, where I'd help build and operate large-scale, reliable data systems that power one of the world's largest communication platforms.

At Amazon, I engineered backend services in **Java** across a **distributed architecture**, with **Mockito** test coverage and **CI/CD** releases on **AWS**, and debugged issues in production-adjacent environments alongside testers. That work maps closely to operating performant infrastructure, troubleshooting live systems, and maintaining quality under fast-paced delivery.

At NYU, I built **PostgreSQL** pipelines with **concurrency control and locking** and deployed services on **Linux** via **Docker**. At CampusMesh, I develop **distributed microservices** backed by **MySQL** and **DynamoDB**, with **Kubernetes**, **Terraform**, and multi-environment deployments on **AWS**. At PwC, I owned a **distributed Azure** backend and diagnosed multi-service production incidents over **SQL Server**.

My stack includes **Java**, **C**, **C++**, **Go**, **PostgreSQL**, **Linux**, **Distributed Systems**, **Kubernetes**, **Terraform**, **Docker**, and **Git**. **Rust**, **ScyllaDB**, and **ElasticSearch** are areas I have not shipped in production yet, but I have strong statically-typed systems fundamentals and have ramped quickly on new storage and infrastructure tooling before.

What pulls me toward Discord is the chance to work on storage primitives and data systems where reliability and performance directly affect how people communicate every day. I care about first-principles engineering on hard distributed systems problems, and I'd welcome contributing to that mission on your team.

I'd welcome the chance to discuss further. Thanks for considering my application.

Sincerely,

Ajay Venkatesh
