

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Machine Learning, Deep Learning, Big Data, Advanced Java, Data Structures

Experience

• CampusMesh

Software Engineer

Jan 2026 – Present

New York, US

- Developed scalable **Node.js microservices** powering real-time academic workflows across study groups, messaging, calls, notifications, and profile management, backed by **MySQL (Sequelize)** and **DynamoDB**.
- Deployed **serverless architecture** on AWS using **Serverless Framework** with **Lambda**, **API Gateway**, **S3**, and **CloudFront** across **4 environments**; enforced access control with **KMS-managed keys**, **SSM Parameter Store**, and **least-privilege IAM**.
- Worked on **LLM-based retrieval pipelines (RAG)** for CampusIQ (AI Assistant), leveraging **embedding-based semantic search** and structured data indexing to improve contextual accuracy by **30%**.

• Amazon

Software Development Engineer Intern

May 2025 – Aug 2025

Seattle, US

- Built a secure internal console for fulfillment center teams; established **Role-Based Access (4+ roles)** via **OAuth**, **Midway SSO**, **HELIS** and documented solution design for cross-team handoff.
- Provisioned **serverless Infrastructure-as-Code** using **AWS CDK** with **API Gateway**, **Lambda**, **DynamoDB**, **S3**, and **IAM**; reduced provisioning time **70%** with **multi-stage CI/CD** through **Git**-based build automation.
- Engineered backend **REST APIs** in **Java** (**Coral**, **Smithy**, **Dagger**, **CBOR**); troubleshooted integration and permission issues across services with unit/integration testing via **Mockito**.

• New York University (Novel AI Technologies, Inc.)

Software Developer

Aug 2024 – Present

New York, US

- Developed an insurance analytics platform (**React**, **Node.js**, **REST APIs**) deployed via **Docker** on **EC2**; implemented **Stripe billing**, **RBAC**, and row-level security across regulated client workflows.
- Streamlined underwriting via a broker portal integrated with external insurer platforms; automated **document/media processing** and **WebSocket-based** status updates for operations partners.
- Engineered **ETL pipelines** transforming **NoSQL** into **PostgreSQL**; processed **250K+** records and powered **AWS QuickSight** dashboards for reporting and data quality review.

• PricewaterhouseCoopers (PwC)

Senior Software Engineer

Aug 2021 – Aug 2024

Bengaluru, India

- Built internal applications and **REST API integrations** on **Microsoft Azure** and **Dynamics 365 CRM** for a regulated health platform; connected **ERP**-adjacent onboarding, finance, and operations workflows over **SQL Server**.
- Automated repetitive business processes with **Azure Logic Apps**, **Power Automate flows**, and plugins for validation, notifications, and downstream API calls; cut **100K-record** import time from **5 hours to 1 hour**.
- Managed user accounts, permissions, and security roles using **Azure security groups**; developed access plans that reduced unauthorized-access incidents and improved provisioning efficiency.
- Delivered **Power BI** reporting embedded in portals; authored architecture documentation and deployed through **Azure DevOps** pipelines with code reviews and integration monitoring in an **Agile** delivery model.

Projects

• InviLite (Internal Tooling & Automation) | Python, AWS, Lambda, Kinesis, Bedrock, FAISS

- Built internal tooling that ingests operational data through automated pipelines (**Kinesis**, **Lambda**, **S3**, **Glue**, **DynamoDB**) to improve reporting and triage across business systems.
- Developed a **RAG workflow** with **AWS Bedrock** to accelerate root-cause investigation and classification, cutting incident resolution from **1–2 hours to minutes**.

• Hospital Management System (Full-Stack Application) | React, Node.js, Express, MongoDB, REST APIs

- Built a full-stack platform with **REST APIs** managing appointments, patient records, and lab reports; implemented **role-based access control** and cross-module data integrations.

Skills

- **Programming Languages:** C#, Python, Java, JavaScript, TypeScript, SQL (T-SQL), PowerShell
- **Web & Backend:** .NET, REST API, React, Node.js, Express.js, Microservices, GraphQL API
- **Databases:** SQL Server, Dataverse, PostgreSQL, MySQL, DynamoDB, MongoDB
- **Cloud & DevOps:** Azure (Logic Apps, Function Apps, DevOps, OpenAI), AWS (CDK, Lambda, IAM, SageMaker, Bedrock), Docker, CI/CD, Git
- **Microsoft Stack:** Dynamics 365 CRM, Power Platform, Power Automate, Power BI, Microsoft 365
- **Tools & Platforms:** Visual Studio, Postman, Linux, Windows, macOS, Jupyter
