Hiring Manager

GM Financial

Dear Hiring Manager,

I'm Ajay Venkatesh, completing an M.S. in Computer Engineering at NYU, with production software experience at PwC in Bengaluru, a summer SDE internship at Amazon, and ongoing on-campus work at NYU's Novel AI Technologies. I'm applying for the Software Engineer role at GM Financial, where I'd develop web, API, and data services with a production-first mindset focused on scale, quality, and reliable cloud delivery.

At PwC, I developed a distributed **.NET/Azure** backend integrated with **Microsoft CRM** and **SQL Server**, participated in **Azure DevOps** workflows, optimized **SQL query performance**, and implemented **security controls** while leading peer reviews on a multi-service platform. That work maps closely to building scalable financial products with strong data analysis, test discipline, and operational support.

At Amazon, I engineered **Java** backend services with automated test coverage and built a **React** web application with **JavaScript** and **CSS**, plus **OAuth**-based access controls on **AWS**. At NYU and CampusMesh, I ship **Node.js API services**, **PostgreSQL/MySQL** data pipelines, and containerized deployments with **Docker**, **Kubernetes**, and **Terraform/Jenkins-style CI/CD** practices.

My stack includes **Java**, **JavaScript**, **C#**, **React**, **Node.js**, **SQL Server**, **PostgreSQL**, **Azure DevOps**, **Docker**, **Kubernetes**, **Terraform**, **Jenkins**, and **Git**. **Angular**, **Tibco BusinessWorks**, **Logic Apps**, and **Xamarin** are areas I have not shipped in production yet, but I have ramped quickly on new Azure and integration tooling in prior enterprise roles.

What pulls me toward GM Financial is the chance to build lending and mobility finance software where uptime, security, and regulated workflows have direct customer impact. I'd welcome contributing to cloud migration, test automation, and cross-functional Scrum delivery on your team.

I'd welcome the chance to discuss further. Thanks for considering my application.

Sincerely,

Ajay Venkatesh
