Hiring Manager

Mastercard

United States

Dear Hiring Manager,

I'm Ajay Venkatesh, completing an M.S. in Computer Engineering at NYU, with production software experience at PwC in Bengaluru, a summer SDE internship at Amazon, and ongoing on-campus work at NYU's Novel AI Technologies. I'm applying for the cloud and platform engineering role at Mastercard, where I'd help build secure, resilient AWS infrastructure and shared platform capabilities for application and SRE partners.

At Amazon, I provisioned **Infrastructure-as-Code** with **AWS CDK** across **VPC** networking, **IAM**, **API Gateway**, **Lambda**, **S3**, and **CloudWatch**, and operated an event-driven stack on **ECS Fargate**, **SQS**, and **SNS**. I ran **Git**-based **CI/CD** through multi-stage deployments, documented operational readiness, and investigated production-adjacent issues with structured root-cause analysis.

At CampusMesh, I operate shared **AWS** services across multiple environments with **least-privilege IAM**, **KMS**, and **SSM Parameter Store**, partnering with application teams on secure promotion workflows. At NYU, I host containerized services on **EC2 (Linux/Ubuntu)** with **Docker** and built **Python** automation pipelines for data ingestion and reporting. In my InviLite project, I wrote **Python** tooling over **AWS** pipelines to improve triage and platform stability.

My stack includes **Python**, **AWS (EC2, VPC, IAM, Lambda, ECS)**, **CDK**, **Docker**, **Kubernetes fundamentals**, **Linux**, **Git**, and **CI/CD**. Hands-on **EKS/KOPS** cluster operations and dedicated **Terraform** module ownership are areas I have not led end-to-end in production yet, but my **CDK** delivery experience and container work on **ECS** give me a strong foundation to ramp on your platform stack.

What pulls me toward Mastercard is the chance to build shared infrastructure where reliability and security directly affect global payments and digital commerce. I care about platform engineering that helps teams ship safely at scale, and I'd welcome contributing to that work.

I'd welcome the chance to discuss further. Thanks for considering my application.

Sincerely,

Ajay Venkatesh
