

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Machine Learning, Deep Learning, Big Data, Data Structures

Experience

- **CampusMesh** Jan 2026 – Present
Software Engineer
New York, US
 - Developed scalable **Node.js/Python microservices** and **REST APIs** powering real-time messaging, notifications, and profile workflows across a **distributed system** backed by **MySQL** and **DynamoDB**.
 - Deployed **serverless backend services** on **AWS** (Lambda, API Gateway, S3, CloudFront) with **asynchronous processing** patterns across local through production environments; enforced security with **KMS**, **SSM**, and least-privilege **IAM**.
- **Amazon** May 2025 – Aug 2025
Software Development Engineer Intern
Seattle, US
 - Engineered backend services in **Java** (Coral, Smithy, Dagger, CBOR) with unit/integration testing via **Mockito**; shipped features through **multi-stage CI/CD** on **AWS**.
 - Provisioned **serverless Infrastructure-as-Code** using **AWS CDK** with API Gateway, Lambda, **DynamoDB**, S3, and IAM; reduced provisioning time **70%** with multi-region deployments.
 - Troubleshot production-adjacent defects with testers; built internal tooling and a **React** console with optimized API integration for operational debugging.
- **New York University (Novel AI Technologies, Inc.)** Aug 2024 – Present
Software Developer
New York, US
 - Engineered **Python ETL pipelines** and **REST APIs** transforming **NoSQL** into **PostgreSQL** with concurrency controls; processed **250K+** records for analytics workloads.
 - Developed a customer data platform module (**React**, **Node.js**, **REST APIs**) on **Docker/EC2**; implemented **RBAC** and row-level security for multi-tenant access.
- **PricewaterhouseCoopers (PwC)** Aug 2021 – Aug 2024
Senior Software Engineer
Bengaluru, India
 - Developed a **distributed backend** on Microsoft **Azure** with **asynchronous message processing** and fault-tolerant retries over **SQL Server** in a production environment.
 - Diagnosed multi-service production incidents via logs and metrics; led code reviews and mentored engineers on scalable system design.

Projects

- **InviLite (Event-Driven Data Pipeline)** | *Python, AWS, Kinesis, Lambda, DynamoDB, S3*
 - Architected a cloud-native **Python** ingestion pipeline with **asynchronous event processing** (Kinesis, Lambda, S3, Glue, **DynamoDB**) for structured and unstructured customer data.
- **Hospital Management System (API Backend)** | *Python, Node.js, Express, MongoDB, REST API*
 - Built scalable **REST API services** with **Node.js/Express** and **MongoDB**, applying modular backend design for appointments, records, and access-controlled data flows.

Skills

- **Programming Languages:** Python, Java, Go, TypeScript, JavaScript (ES6), SQL, C++
- **Web & Backend:** Node.js, Express.js, REST API, GraphQL, Microservices, React
- **Databases:** PostgreSQL, DynamoDB, MySQL, MongoDB, SQL Server
- **Cloud & DevOps:** AWS (CDK, Lambda, EC2, S3, API Gateway, DynamoDB, ECS, IAM), Kubernetes, Docker, CI/CD
- **Tools & Platforms:** Git, Linux, Cursor, GitHub Copilot, Postman, Mockito

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals
