

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Machine Learning, Deep Learning, Big Data, Data Structures

Experience

- **CampusMesh** Jan 2026 – Present
Software Engineer
– Built **consumer-facing** real-time features (messaging, calls, notifications, study groups) as **TypeScript/Node.js microservices** in a **distributed architecture** backed by **MySQL** and **DynamoDB**.
– Deployed **serverless services** on **AWS Lambda**, **API Gateway**, **S3**, and **CloudFront** across local through production environments; designed **data models** and access patterns for high-throughput campus workflows.
– Shipped **LLM-powered retrieval (RAG)** for CampusIQ using **embedding-based semantic search**, accelerating feature development with **Cursor** and **GitHub Copilot**.
- **Amazon** May 2025 – Aug 2025
Software Development Engineer Intern
Seattle, US
– Built a high-throughput, event-driven triage system on **AWS ECS Fargate**, **SQS**, **SNS**, decoupling distributed message processing and reducing response latency by **50%**.
– Provisioned **AWS CDK** infrastructure with **Lambda**, **DynamoDB**, **API Gateway**, **S3**, and **IAM**; collaborated with product and engineering leads to launch internal tooling used at scale.
– Built a **React/TypeScript** frontend with optimized API integration, caching, and filtering for operational users across fulfillment centers.
- **New York University (Novel AI Technologies, Inc.)** Aug 2024 – Present
Software Developer
New York, US
– Developed a **consumer-facing** insurance analytics platform (**React**, **TypeScript**, **Node.js**, **REST APIs**) on **Docker/EC2**; implemented **schema design**, **RBAC**, and row-level security for multi-tenant data.
– Engineered **ETL pipelines** with **data modeling** from **NoSQL** into **PostgreSQL**; designed relational schemas with concurrency control for analytics workloads.
- **PricewaterhouseCoopers (PwC)** Aug 2021 – Aug 2024
Senior Software Engineer
Bengaluru, India
– Developed a **distributed backend** on **Azure** with event-driven processing over **SQL Server**; optimized bulk ingestion and query performance on large datasets.

Projects

- **InviLite (Event-Stream Data Platform)** | *AWS Kinesis, Lambda, DynamoDB, S3, Python*
– Architected a cloud-native pipeline with **AWS Kinesis**, **Lambda**, **S3**, **Glue**, and **DynamoDB** for governed ingestion and processing of high-volume operational event data.
- **Hospital Management System (Full-Stack Application)** | *TypeScript, React, Node.js, MongoDB, REST API*
– Built a **consumer-facing** full-stack app with **React/TypeScript**, **REST APIs**, and document-based **schema design** in **MongoDB** for appointments and patient records.

Skills

- **Programming Languages:** Go, TypeScript, JavaScript (ES6), Python, Java, SQL
- **Web & Backend:** React, Node.js, REST API, Microservices, GraphQL, Sequelize
- **Databases:** DynamoDB, PostgreSQL, MySQL, MongoDB, Data Modeling, Schema Design
- **Cloud & DevOps:** AWS (Lambda, DynamoDB, SQS, Kinesis, CDK, API Gateway, ECS, S3, IAM), Docker, CI/CD
- **AI/ML & Tools:** RAG (LangChain, FAISS), LLMs, Cursor, GitHub Copilot, Git, Postman

Certifications

AWS Cloud Practitioner

Stanford Machine Learning (Coursera)
