Hiring Manager

Texas Instruments

Lehi, UT

Dear Hiring Manager,

I'm Ajay Venkatesh, completing an M.S. in Computer Engineering at NYU, with production software experience at PwC in Bengaluru, a summer SDE internship at Amazon, and ongoing on-campus work at NYU's Novel AI Technologies. I'm applying for the New College Graduate Software Engineer role in Lehi, where I'd support IT Solutions projects across design, implementation, and delivery for semiconductor and business partners.

At Amazon, I engineered backend services in **Java** using **Coral**, **Smithy**, and **Dagger**, applied object-oriented design patterns, and backed changes with **Mockito** unit and integration tests. I also presented solution design for approval and shipped a **React** frontend with disciplined API integration, which reflects the full software lifecycle discipline and collaborative delivery your team expects from new graduates.

At PwC, I built and maintained backend systems on **Microsoft Azure** with **SQL Server** data stores, optimized bulk ingestion pipelines, and mentored engineers through code reviews in a production environment. At NYU, I engineered **Python** and **SQL**-backed **ETL pipelines** into **PostgreSQL** and shipped full-stack applications with strong attention to maintainability and cross-functional communication.

My stack includes **C++**, **Java**, **Python**, **SQL**, **HTML**, **Git**, and **Linux**. **Perl** and dedicated **assembly language** work are not on my resume yet, but my **Computer Engineering** coursework in **data structures** and **Advanced Java**, combined with hands-on **C++** and **Java** development, positions me to ramp quickly in Unix-based environments.

What pulls me toward Texas Instruments is the chance to build software that supports chip design, manufacturing, and enterprise operations at semiconductor scale. I care about strong fundamentals, steady learning through programs like CAP, and contributing as a collaborative engineer in Lehi.

I'd welcome the chance to discuss further. Thanks for considering my application.

Sincerely,

Ajay Venkatesh
