Hiring Manager

Winsupply

Moraine, OH

Dear Hiring Manager,

I'm Ajay Venkatesh, completing an M.S. in Computer Engineering at NYU, with production software experience at PwC in Bengaluru, a summer SDE internship at Amazon, and ongoing on-campus work at NYU's Novel AI Technologies. I'm applying for the Software Developer role at Winsupply, where I'd help build and enhance your e-commerce platform with reliable backend services, APIs, and quality-focused delivery alongside your engineering and QA partners.

At Amazon, I engineered backend services in **Java** using **Coral**, **Smithy**, and **Dagger**, backed changes with **Mockito** unit and integration tests, and provisioned infrastructure with **AWS CDK**, **API Gateway**, **Lambda**, and **IAM**. I also built a **React** frontend with optimized API integration, which maps closely to full-stack feature work, disciplined testing, and shipping in an Agile environment.

At NYU, I developed a full-stack insurance analytics platform with **React**, **Node.js**, and **REST APIs** deployed via **Docker** on **AWS EC2**, and a healthcare web application with **MongoDB** and role-based access controls. In side projects, I built a modular **Java** desktop application with **OOP design patterns** and thread-safe database access, reinforcing the fundamentals your role expects across analysis, design, and implementation.

My stack includes **Java**, **Python**, **C++**, **JavaScript**, **SQL**, **MySQL**, **MongoDB**, **AWS**, **Docker**, **Git**, and **CI/CD**. **Spring Boot** and **Camunda BPMN** are areas I have not owned end-to-end in production yet, but my **Java** backend work, **microservices** exposure, and coursework in **Advanced Java** give me a strong foundation to ramp quickly on your Spring-based e-commerce stack.

What pulls me toward Winsupply is the chance to modernize a wholesale e-commerce platform where solid engineering directly supports distributors and customers nationwide. I care about maintainable code, close collaboration with QA, and steady delivery through Agile ceremonies, and I'd welcome contributing in Moraine.

I'd welcome the chance to discuss further. Thanks for considering my application.

Sincerely,

Ajay Venkatesh
