

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Machine Learning, Deep Learning, Big Data, Advanced Java, Data Structures

Experience

- **CampusMesh** Jan 2026 – Present
Software Engineer
– Developed scalable **Node.js microservices** powering real-time academic workflows across study groups, messaging, calls, notifications, and profile management, backed by **MySQL (Sequelize)** and **DynamoDB**.
– Deployed **serverless architecture** on AWS using **Serverless Framework** with **Lambda**, **API Gateway**, **S3**, and **CloudFront** across **4 environments**; enforced access control with **KMS-managed keys**, **SSM Parameter Store**, and **least-privilege IAM**.
– Worked on **LLM-based retrieval pipelines (RAG)** for CampusIQ (AI Assistant), leveraging **embedding-based semantic search** and structured data indexing to improve contextual accuracy by **30%**.
- **Amazon** May 2025 – Aug 2025
Software Development Engineer Intern
– Built a **React 18** frontend with optimized API integration, advanced filtering, and client-side caching for an internal operations console used by fulfillment center teams.
– Engineered backend **REST APIs** in **Java**; troubleshoot integration and permission issues across services with unit/integration testing via **Mockito**.
– Provisioned **serverless Infrastructure-as-Code** using **AWS CDK**; reduced provisioning time **70%** with **multi-stage CI/CD** through **Git**-based build automation.
- **New York University (Novel AI Technologies, Inc.)** Aug 2024 – Present
Software Developer
– Developed an insurance analytics platform (**React**, **JavaScript**, **Node.js**, **REST APIs**) deployed via **Docker** on **Linux EC2**; implemented **RBAC** and row-level security across regulated client workflows.
– Engineered **Python** and **SQL** ETL jobs transforming **NoSQL** into **PostgreSQL**; processed **250K+** records and structured datasets for **AWS QuickSight** reporting consumed by operations stakeholders.
– Streamlined underwriting via a broker portal integrated with external insurer platforms; translated business requirements into functional prototypes with **WebSocket-based** status updates.
- **PricewaterhouseCoopers (PwC)** Aug 2021 – Aug 2024
Senior Software Engineer
– Built internal enterprise tools and **REST API** integrations on **Microsoft Azure** and **Dynamics 365 CRM** for a regulated health platform; connected onboarding, finance, and operations workflows over **SQL Server**.
– Designed **SQL schemas, views, and stored procedures** optimized for **Power BI** modeling; delivered embedded reporting in portals so downstream analysts could build performant dashboards.
– Automated business processes with **Azure Logic Apps**, **Power Automate**, and custom plugins; extended platform limits using **JavaScript**, **TypeScript**, and **CSS** in **PCF controls**, cutting **100K-record** import time from **5 hours to 1 hour**.
– Acted as technical liaison to business units in **Agile** triage sessions; re-prioritized delivery based on urgent pain points and shipped changes through **Azure DevOps** with integration monitoring.

Projects

- **InviLite (Python Tooling & Automation)** | *Python, AWS Lambda, Kinesis, Bedrock, FAISS*
– Built lightweight **Python** server-side tooling ingesting operational data through automated pipelines (Kinesis, Lambda, S3, Glue, DynamoDB) to support triage and reporting outside the primary application stack.
– Developed a **RAG workflow** with **AWS Bedrock** to accelerate root-cause investigation, cutting incident resolution from **1–2 hours to minutes**.
- **Advanced Expense Tracker (Python Desktop Application)** | *Python, SQLite3, Pandas, Matplotlib*
– Architected a modular **Python application** with secure login and **SQL** persistence over **SQLite3**; implemented concurrent transaction handling and data transformations for real-time cost splitting.

Skills

- **Programming Languages:** Python, JavaScript (ES6), TypeScript, SQL (T-SQL), Java, C#, C++
- **Web & Backend:** React, Node.js, Express.js, REST API, HTML, CSS, Microservices, GraphQL API
- **Databases:** SQL Server, PostgreSQL, MySQL, DynamoDB, MongoDB, Dataverse
- **Cloud & DevOps:** Azure (Logic Apps, Function Apps, DevOps), AWS (CDK, Lambda, EC2, IAM), Docker, CI/CD, Git
- **Microsoft Stack:** Power Platform, Power Automate, Power BI, Dynamics 365 CRM, Microsoft 365
- **Tools & Platforms:** Visual Studio, Postman, Jupyter, Linux, Windows

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals

Power BI Data Analyst Associate
