

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Computer Architecture, Data Structures, Machine Learning, Big Data

Experience

- Amazon

May 2025 – Aug 2025

Software Development Engineer Intern

Seattle, US

– Architected a secure internal operations console with **role-based access control** for **4+ roles** via **OAuth**, **Midway SSO**, and **HELIS**; presented access-control design for review before production rollout.

– Engineered backend services in **Java** with **REST APIs** and **CBOR** serialization; wrote **unit and integration tests** with **Mockito** and participated in security-minded code reviews with senior engineers.

– Provisioned **AWS CDK** infrastructure with **API Gateway**, **Lambda**, **DynamoDB**, **S3**, and least-privilege **IAM**; supported **multi-stage CI/CD** releases across regions.
- CampusMesh

Jan 2026 – Present

Software Engineer

New York, US

– Deployed serverless services on **AWS (Lambda, API Gateway, S3, CloudFront)** across **4 environments**; enforced secure configuration with **KMS-managed keys**, **SSM Parameter Store**, and least-privilege **IAM** policies.

– Developed **Node.js** microservices for real-time workflows; troubleshooted cross-service integration defects and documented secure deployment runbooks on **Linux** hosts.
- New York University (Novel AI Technologies, Inc.)

Aug 2024 – Present

Software Developer

New York, US

– Built a production analytics platform (**React**, **Node.js**, **REST APIs**) on **Docker/EC2** with **RBAC** and row-level security for multi-tenant insurer and broker users.

– Engineered **Python/SQL** pipelines into **PostgreSQL** with concurrency controls; validated data integrity and access boundaries for operations stakeholders.
- PricewaterhouseCoopers (PwC)

Aug 2021 – Aug 2024

Senior Software Engineer

Bengaluru, India

– Developed production services on **Microsoft Azure** with fault-tolerant retries over **SQL Server**; led code reviews and production troubleshooting in a regulated healthcare environment.

– Mentored engineers on software design and testing practices, reducing production defects by **25%** through stronger review discipline.

Projects

- Advanced Expense Tracker (C++ Application) | C++, STL, OOP, Multithreading, SQLite, Unit Testing

– Architected a modular **C++** application with secure login, **STL**-based collections, **MVC/DAO** patterns, and thread-safe **SQLite** persistence; added synchronized blocks for concurrent updates and local validation tests.
- Hospital Management System (Secure Full-Stack Application) | React, Node.js, Express, MongoDB, RBAC

– Built a full-stack platform with **role-based access control** and **REST APIs**; wrote API **unit tests** for authentication and authorization paths on critical service endpoints.

Skills

- **Programming Languages:** C++, Python, Go, Java, JavaScript (ES6), TypeScript, SQL
- **Security & Systems:** OAuth, RBAC, IAM, KMS, Least-Privilege Access, Secure Service Integration
- **Web & Backend:** REST API, Node.js, React, Microservices, Express.js
- **Databases:** PostgreSQL, MySQL, SQLite, DynamoDB, MongoDB
- **Cloud & DevOps:** AWS (CDK, Lambda, API Gateway, ECS, S3, IAM), Docker, Kubernetes, CI/CD, Linux, Git
- **Testing & Tools:** Unit Testing, Integration Testing, Mockito, JUnit, Postman, Visual Studio

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals

Stanford Machine Learning (Coursera)
