

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Data Structures, Machine Learning, Big Data, Advanced Java

Experience

- **CampusMesh** Jan 2026 – Present
Software Engineer
New York, US
 - Developed and maintained **JavaScript/Node.js** features and **REST APIs** for member-facing workflows; participated in **code reviews**, defect triage, and **Git**-based delivery across **4 AWS environments**.
 - Shipped production changes using **Cursor** and **GitHub Copilot** for AI-assisted coding, refactoring, and test scaffolding; validated generated code through peer review and **unit tests**.
 - Wrote and optimized **SQL queries** over **MySQL (Sequelize)** and **DynamoDB**; collaborated with product stakeholders to translate requirements into maintainable implementations.
- **Amazon** May 2025 – Aug 2025
Software Development Engineer Intern
Seattle, US
 - Built a **React 18** frontend and backend **REST APIs** in **Java** for an internal operations console; implemented features, bug fixes, and enhancements with mentor guidance.
 - Wrote **unit and integration tests** with **JUnit** and **Mockito**; troubleshooted application defects and incorporated feedback from structured **code reviews**.
 - Supported releases through **multi-stage CI/CD** pipelines provisioned via **AWS CDK** and documented API behavior for cross-team handoff.
- **New York University (Novel AI Technologies, Inc.)** Aug 2024 – Present
Software Developer
New York, US
 - Developed an **insurance analytics platform (React, JavaScript, Node.js, REST APIs)** for P&C-style underwriting workflows; deployed via **Docker** on **AWS EC2** for insurer and broker users.
 - Built a broker portal integrated with external insurer systems; delivered enhancements from business analyst feedback with **WebSocket** updates and **RBAC** across **6 insurance clients**.
 - Authored **SQL** ETL jobs into **PostgreSQL**; processed **250K+** records and validated reporting outputs against functional requirements with operations partners.
- **PricewaterhouseCoopers (PwC)** Aug 2021 – Aug 2024
Senior Software Engineer
Bengaluru, India
 - Developed and maintained applications on **Microsoft Azure** using **C#/.NET** and **REST API** integrations with **Dynamics 365 CRM**; wrote **SQL queries and stored procedures** over **SQL Server**.
 - Participated in **Agile/Scrum** ceremonies, code reviews, and **Azure DevOps CI/CD** deployments; troubleshooted defects and automated repetitive workflows, reducing production bugs by **25%**.

Projects

- **Hospital Management System (Full-Stack Application)** | *React, JavaScript, Node.js, Express, MongoDB, SQL*
 - Built a full-stack application with **React** and **REST APIs** managing appointments, patient records, and lab reports; implemented **role-based access control** and documented modules for team handoff.
 - Wrote **API unit tests** for critical service paths and used AI-assisted tooling to identify edge cases during integration testing.
- **Advanced Expense Tracker (Java Desktop Application)** | *Java, JDBC, SQLite, SQL, JUnit*
 - Architected a modular **Java** application with secure login, **SQL** persistence via **JDBC**, and **JUnit** tests for core business logic using **OOP** and **MVC/DAO** patterns.

Skills

- **Programming Languages:** Java, JavaScript (ES6), TypeScript, C#, Python, SQL (T-SQL), C++
- **Web & Backend:** React, Node.js, Express.js, .NET, REST API, Microservices
- **Database:** SQL Server, PostgreSQL, MySQL, MongoDB, DynamoDB
- **Cloud & DevOps:** AWS (EC2, Lambda, CDK), Azure (DevOps, Function Apps), Docker, CI/CD, Git
- **AI Coding Tools:** Cursor, GitHub Copilot
- **Testing & Tools:** JUnit, Mockito, Jest, Postman, Visual Studio, Linux

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals

Stanford Machine Learning (Coursera)
