

Education

New York University, New York, NY

Sep 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Machine Learning, Deep Learning, Big Data, Advanced Java, Data Structures

Experience

- **CampusMesh** Jan 2026 – Present
Software Engineer
– Built scalable **Node.js microservices** and **REST APIs** for member-facing workflows across messaging, calls, notifications, and profile management, backed by **MySQL (Sequelize)** and **DynamoDB**.
– Deployed container-ready **serverless services** on **AWS (Lambda, API Gateway, S3, CloudFront)** across **4 environments** with **Git**-driven promotion, **KMS/SSM** secrets, and **least-privilege IAM**.
– Applied **LLM retrieval pipelines (RAG)** for CampusIQ, using **embedding-based semantic search** to improve contextual accuracy by **30%** and accelerate developer productivity.
- **Amazon** May 2025 – Aug 2025
Software Development Engineer Intern
Seattle, US
– Provisioned **Infrastructure-as-Code** with **AWS CDK** (API Gateway, Lambda, DynamoDB, S3, IAM, **CloudWatch** metrics/alarms), reducing provisioning time **70%** via **multi-stage CI/CD** across regions.
– Engineered backend **Java microservices** (**Coral, Smithy, Dagger**) with **REST API** integration; wrote **unit and integration tests** with **JUnit** and **Mockito**, cutting execution time by **35%**.
– Supported an event-driven platform on **AWS ECS Fargate, SQS, and SNS**, improving incident response latency by **50%** through structured logging and operational metrics.
- **New York University (Novel AI Technologies, Inc.)** Aug 2024 – Present
Software Developer (On-Campus)
New York, US
– Developed an **insurance analytics platform** (**React, Node.js, REST APIs**) for P&C-style underwriting workflows; deployed **Docker** containers on **AWS EC2 (Linux)**, **RBAC**, and row-level security across **6 insurer clients**.
– Built a broker portal integrated with insurer systems with **document processing** and **WebSocket** real-time updates; generated **\$50K+** revenue through Stripe billing and multi-tenant service design.
– Engineered **Python ETL pipelines** into **PostgreSQL** with concurrency control; processed **250K+** records and powered **AWS QuickSight** dashboards for operational monitoring.
- **PricewaterhouseCoopers (PwC)** Aug 2021 – Aug 2024
Senior Software Engineer
Bengaluru, India
– Developed a distributed backend on **Microsoft Azure** with event-driven processing and fault-tolerant retries over **SQL Server**; participated in code reviews and agile delivery with cross-functional teams.
– Deployed an **NLP-based OCR model** on Azure to automate structured data extraction, reducing processing time by **75%**; optimized bulk ingestion from **100K-row** feeds from **5 hours to 1 hour**.

Projects

- **Advanced Expense Tracker (Java Application)** | *Java, JavaFX, JDBC, SQLite, JUnit, Multithreading*
– Architected a modular **Java application** with **OOP, MVC & DAO** patterns, concurrent transaction handling, and **JUnit** tests for core business logic.
- **InviLite (Distributed Monitoring Platform)** | *Python, AWS, ECS, CloudWatch, Lambda, Kinesis*
– Built cloud-native ingestion pipelines with **CloudWatch** logging and metrics; automated triage workflows on **AWS ECS/Lambda**, cutting incident resolution from **1–2 hours to minutes**.

Skills

- **Programming Languages:** Java, Python, Node.js, TypeScript, JavaScript (ES6), SQL, C++
- **Web & Backend:** REST API, Microservices, React, Node.js, Express.js, Sequelize
- **Database:** MySQL, PostgreSQL, SQL Server, DynamoDB, MongoDB
- **Cloud & DevOps:** AWS (CDK, EC2, ECS Fargate, Lambda, S3, CloudWatch, IAM), Azure, Docker, Kubernetes, CI/CD, Linux
- **Testing & Observability:** JUnit, Mockito, Git, Postman, CloudWatch (metrics, logging)
- **AI/ML:** LLM Fine-tuning, RAG (LangChain, FAISS), NLP, Hugging Face

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals

Stanford Machine Learning (Coursera)
