

Education

New York University, New York, NY

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Machine Learning, Deep Learning, Big Data, Computer Architecture, Data Structures

Aug 2024 – May 2026

Experience

- **New York University (Novel AI Technologies, Inc.)**

Software Engineer (Mobile & Cloud)

– Designed and built cross-platform mobile experiences for **iOS** and **Android** using **React Native**, ingesting real-time wearable telemetry on an NSF-funded connected product with reactive UI patterns and panelist-facing dashboards.

– Integrated mobile clients with **Python/Node.js REST APIs**, **WebSocket** channels, and cloud services on **AWS EC2 (Linux)** via **Docker**; implemented **AWS Cognito** auth and **RBAC** for consent-aware data handling.

– Engineered **Python ETL pipelines** into **PostgreSQL** and local **SQLite**-backed modules; documented APIs and module boundaries for cross-functional hardware, test, and product partners across the full SDLC.

Aug 2024 – Present
New York, US

• **Amazon**

Software Development Engineer Intern

– Built a **React 18** and **TypeScript** UI integrated with backend **REST APIs**; improved responsiveness through caching, filtering, and client-side state patterns with **Jest** test coverage.

– Provisioned cloud infrastructure with **AWS CDK (Lambda, API Gateway, DynamoDB, S3, IAM)** and **multi-stage CI/CD**; troubleshoot integration defects through code reviews and structured debugging.

May 2025 – Aug 2025
Seattle, US

• **CampusMesh**

Software Engineer

– Developed **Node.js REST APIs** and real-time services for messaging, calls, and notifications; deployed **serverless** workloads on **AWS (Lambda, API Gateway, S3, CloudFront)** across **4 environments** with **Git**-driven CI/CD.

– Maintained **MySQL** and **DynamoDB** data layers with optimized **SQL queries**; partnered with product and QA on releases, documentation, and production defect triage.

Jan 2026 – Present
New York, US

• **PricewaterhouseCoopers (PwC)**

Senior Software Engineer

– Developed **C#/.NET** services and **REST API** integrations on **Microsoft Azure** over **SQL Server**; participated in **Agile** delivery, code reviews, and **Azure DevOps CI/CD** deployments with documented handoffs.

Aug 2021 – Aug 2024
Bengaluru, India
- ## Projects
- **Remote Health Monitoring (Cross-Platform Mobile App)** | *React Native, TypeScript, iOS, Android, AWS Cognito, WebSockets*

– Built a mobile app for continuous telemetry capture, secure login, and real-time status updates integrated with cloud-backed analytics and restricted-bandwidth sync patterns.

• **Advanced Expense Tracker (Java Desktop Application)** | *Java, JDBC, SQLite, SQL, JUnit, Multithreading*

– Architected a modular **Java** application with **SQLite** persistence, thread-safe concurrent writes, and **JUnit** tests using **OOP** and **MVC/DAO** design patterns.

Skills

• **Mobile & UI:** React Native, iOS, Android, TypeScript, JavaScript (ES6), HTML5, CSS3, Reactive UI Patterns

• **Programming Languages:** Python, Java, C#, SQL, C++

• **Backend & APIs:** Node.js, REST API, WebSockets, Microservices, Express.js

• **Databases:** SQLite, PostgreSQL, MySQL, DynamoDB, SQL Server

• **Cloud & DevOps:** AWS (Lambda, API Gateway, EC2, Cognito, S3, CDK), Docker, Linux, CI/CD, Git

• **Testing & Tools:** JUnit, Jest, Mockito, Postman, Visual Studio, Code Reviews

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals

Stanford Machine Learning (Coursera)
