

Education

New York University, New York, NY

Sep 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Machine Learning, Deep Learning, Big Data, Advanced Java, Data Structures

Experience

• CampusMesh

Software Engineer

Jan 2026 – Present

New York, US

- Built scalable **Node.js microservices** and **REST APIs** powering real-time academic workflows across messaging, calls, notifications, and profile management, backed by **MySQL (Sequelize)** and **DynamoDB**.
- Deployed **serverless services** on **AWS (Lambda, API Gateway, S3, CloudFront)** across **4 environments**; participated in **Agile** delivery, **code reviews**, and **Git-based CI/CD** promotion.
- Worked on **LLM retrieval pipelines (RAG)** for CampusIQ, applying **embedding-based semantic search** and structured indexing to improve contextual accuracy by **30%** alongside data-focused product partners.

• Amazon

Software Development Engineer Intern

May 2025 – Aug 2025

Seattle, US

- Built a **React 18** frontend consuming backend **REST APIs** for an internal data console with advanced filtering, caching, and role-based views; reduced page load time by **40%**.
- Engineered modular **Java microservices (Coral, Smithy, Dagger)** serving API layers; wrote **JUnit** and **Mockito** tests and participated in pair-style design and **code review** sessions.
- Provisioned **Infrastructure-as-Code** with **AWS CDK**; supported an event-driven platform on **ECS Fargate, SQS, and SNS** with **multi-stage CI/CD** across regions.

• New York University (Novel AI Technologies, Inc.)

Software Developer

Aug 2024 – Present

New York, US

- Developed an analytics platform (**React, TypeScript, Node.js, REST APIs**) with consistent UI patterns for operations partners; deployed via **Docker** on **AWS EC2 (Linux)** with **RBAC** across **6 clients**.
- Engineered **Python/SQL ETL pipelines** into **PostgreSQL**; processed **250K+** records and powered **AWS QuickSight** dashboards serving reporting and validation workflows.
- Collaborated with data science partners on **NLP** and model-driven features, integrating inference outputs into production **REST API** endpoints and real-time **WebSocket** updates.

• PricewaterhouseCoopers (PwC)

Senior Software Engineer

Aug 2021 – Aug 2024

Bengaluru, India

- Developed distributed backend services on **Microsoft Azure** over **SQL Server**; wrote **SQL queries** and **stored procedures** and participated in **Agile** ceremonies and cross-functional code reviews.
- Deployed an **NLP-based OCR model** on Azure to extract structured fields from documents, reducing processing time by **75%**; optimized bulk ingestion from **100K-row** feeds from **5 hours to 1 hour**.

Projects

• Advanced Expense Tracker (Java Application) | Java, JDBC, SQLite, SQL, JUnit

- Architected modular, testable **Java** services with **OOP, MVC & DAO** patterns, **SQL** persistence, and **JUnit** coverage for core business logic.

• RoBERTa Fine-Tuning with Custom LoRA | Python, PyTorch, Hugging Face, NLP

- Built a **parameter-efficient fine-tuning** pipeline for **RoBERTa-base** text classification; collaborated on hyperparameter tuning and evaluation metrics for production-style **NLP** experimentation.

Skills

- **Programming Languages:** Java, TypeScript, JavaScript (ES6), Python, SQL, C++
- **Web & Backend:** React, Node.js, Express.js, REST API, Microservices, Sequelize
- **Database:** PostgreSQL, MySQL, SQL Server, DynamoDB, MongoDB
- **Cloud & DevOps:** AWS (CDK, EC2, ECS Fargate, Lambda, S3, SQS, SNS, CloudWatch), Azure, Docker, Kubernetes, CI/CD, Linux
- **AI/ML & Data:** NLP, PyTorch, Hugging Face, RAG (LangChain, FAISS), Big Data, Pandas
- **Testing & Tools:** JUnit, Mockito, Jest, Git, Postman, Visual Studio

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals

Stanford Machine Learning (Coursera)
