

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Machine Learning, Deep Learning, Big Data, Computer Architecture, Data Structures

Experience

- **CampusMesh** Jan 2026 – Present
Software Engineer
– Developed and maintained **Node.js microservices** and **REST APIs** integrating **AWS services (Lambda, API Gateway, S3, CloudFront)** across **4 environments** with **Git**-based release promotion and documented deployment runbooks.
– Troubleshot configuration and integration defects across **MySQL** and **DynamoDB** stores; enforced **least-privilege IAM, KMS, and SSM Parameter Store** for secure cloud operations on **Linux**-hosted workloads.
– Partnered with product and engineering stakeholders to deliver member-facing workflows for messaging, notifications, and profile management following established development standards.
- **Amazon** May 2025 – Aug 2025
Software Development Engineer Intern
– Provisioned **Infrastructure-as-Code** with **AWS CDK (CloudFormation)** deploying API Gateway, Lambda, DynamoDB, S3, IAM, and **CloudWatch**; reduced provisioning time **70%** via **multi-stage CI/CD** across regions.
– Integrated cloud services through backend **REST APIs** in **Java**; debugged cross-service defects and wrote **unit/integration tests** with **Mockito**, documenting API behavior and test procedures for handoff.
– Supported an event-driven platform on **AWS ECS Fargate, SQS, and SNS**, improving operational response latency by **50%** through structured logging and automated validation in release pipelines.
- **New York University (Novel AI Technologies, Inc.)** Aug 2024 – Present
Software Developer
– Deployed containerized cloud solutions with **Docker** on **AWS EC2 (Linux)**; maintained networking, access controls, and runtime stability for a **React, Node.js, REST API** analytics platform.
– Engineered **Python** ETL pipelines into **PostgreSQL** with **SQL** transformations; processed **250K+** records and monitored data quality through **AWS QuickSight** dashboards.
– Deployed **AWS SageMaker** inference endpoints for ML workloads; troubleshot model-serving configuration issues with cross-functional partners.
- **PricewaterhouseCoopers (PwC)** Aug 2021 – Aug 2024
Senior Software Engineer
– Developed and maintained distributed services on **Microsoft Azure** over **SQL Server**; shipped changes through **Azure DevOps CI/CD** with integration monitoring and documented solution designs.
– Automated repetitive data ingestion with **parallel processing** on **100K-row** feeds, cutting execution from **5 hours to 1 hour**; identified and resolved production defects through structured debugging and code reviews.

Projects

- **InviLite (Cloud Data & Automation Pipeline)** | *Python, AWS, Kinesis, Lambda, S3, Glue, DynamoDB, CloudWatch*
– Built cloud-native ingestion pipelines storing structured and unstructured data in **S3** and **DynamoDB**; automated triage workflows with **Lambda** and **CloudWatch** observability, cutting incident resolution from **1–2 hours to minutes**.
- **Hospital Management System (Full-Stack Application)** | *React, Node.js, Express, MongoDB, AWS SageMaker, PyTorch*
– Built a full-stack platform with **REST APIs** and **MongoDB** document storage for patient records and lab reports; implemented **role-based access control** and **API unit tests** for critical service paths.
– Fine-tuned a transformer model with **PyTorch** and **Hugging Face**, deploying inference on **AWS SageMaker** for real-time diagnostic support.

Skills

- **Programming Languages:** C++, Python, Java, JavaScript, TypeScript, SQL, Bash
- **Web & Backend:** Node.js, Express.js, React, REST API, Microservices
- **Databases:** PostgreSQL, MySQL, SQL Server, MongoDB, DynamoDB
- **Cloud & DevOps:** AWS (CDK, CloudFormation, EC2, S3, Lambda, ECS Fargate, IAM, CloudWatch, SageMaker), Azure (DevOps, Function Apps), Docker, Kubernetes, CI/CD, Linux
- **AI/ML:** PyTorch, Hugging Face, SageMaker, Deep Learning, NLP
- **Testing & Tools:** Mockito, Jest, Git, Postman, Visual Studio, Cursor, Jupyter
