

Education

New York University, New York, NY

Sep 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Big Data, Machine Learning, Deep Learning, Advanced Java, Data Structures

Experience

- **CampusMesh** Jan 2026 – Present
Software Engineer
New York, US
 - Built scalable **REST API** microservices in **Node.js** for real-time workflows across messaging, calls, and notifications, backed by **MySQL (Sequelize)** and **DynamoDB** with operability across **4 environments**.
 - Deployed **serverless architecture** on AWS (**Lambda, API Gateway, S3, CloudFront**) with **KMS/SSM** secrets and **least-privilege IAM**; reviewed peer changes and refactored modules to reduce technical debt.
 - Used **Cursor** and **GitHub Copilot** to accelerate feature delivery while validating generated code through reviews and production debugging.
- **Amazon** May 2025 – Aug 2025
Software Development Engineer Intern
Seattle, US
 - Engineered high-throughput backend **Java REST APIs (Coral, Smithy, Dagger)** with **JUnit/Mockito** tests; optimized execution time by **35%** through design patterns and performance-focused refactors.
 - Built a real-time, event-driven platform on **AWS ECS Fargate, SQS, SNS** with **CloudWatch** observability, improving incident response latency by **50%** at production scale.
 - Presented **system design** for approval and provisioned **AWS CDK** infrastructure with **multi-stage CI/CD**; provided code review feedback on correctness, security, and maintainability.
- **New York University (Novel AI Technologies, Inc.)** Aug 2024 – Present
Software Developer
New York, US
 - Developed an insurance analytics platform (**React, Node.js, REST APIs**) for underwriting decision workflows; implemented **RBAC**, row-level security, and **Stripe** billing across regulated e-commerce-style client flows.
 - Engineered **SQL** ETL pipelines into **PostgreSQL** with concurrency control; processed **250K+** records and powered operational dashboards for monitoring and data quality.
 - Delivered **WebSocket**-based real-time updates on a broker portal; collaborated with product stakeholders to ship enhancements from user feedback on a fast-moving team.
- **PricewaterhouseCoopers (PwC)** Aug 2021 – Aug 2024
Senior Software Engineer
Bengaluru, India
 - Designed a distributed backend on **Microsoft Azure** with event-driven processing and fault-tolerant retries over **SQL Server**; proactively addressed technical debt in batch ingestion paths.
 - Optimized parallel processing on **100K-row** feeds from **5 hours to 1 hour**; mentored engineers on **software architecture** and testing, reducing production bugs by **25%**.

Projects

- **Flight Delay Prediction (Real-Time Scoring Pipeline)** | *PySpark, Apache Spark, SQL, HDFS, Random Forest, Gradient Boosted Tree*
 - Built a scalable **Apache Spark/PySpark** pipeline on **HDFS** to engineer features from **7M+** records using **SQL** aggregation; trained classification models for data-driven decision outputs at scale.
- **InviLite (Decisioning & Reliability Platform)** | *Java, Python, AWS, ECS, CloudWatch, Lambda, SageMaker*
 - Architected ingestion and scoring workflows with **CloudWatch** monitoring; improved automated classification accuracy from **56% to 92%** and cut incident resolution from **1–2 hours to minutes**.

Skills

- **Programming Languages:** Java, Python, SQL, TypeScript, JavaScript (ES6), C++
- **Backend & APIs:** REST/HTTP APIs, Microservices, Software Design, Software Architecture, Scalability
- **Data & Processing:** Apache Spark, PySpark, PostgreSQL, SQL Server, MySQL, DynamoDB, MongoDB
- **Cloud & DevOps:** GCP (BigQuery), AWS (ECS, Lambda, CDK, S3, CloudWatch, IAM), Docker, Kubernetes, Linux, CI/CD
- **Engineering Practices:** Performance Optimization, Reliability Engineering, JUnit, Mockito, Code Reviews
- **Tools:** Git, Visual Studio, Cursor, GitHub Copilot, Postman, Jupyter

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals

Stanford Machine Learning (Coursera)
