

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Data Structures, Machine Learning, Big Data, Advanced Java

Experience

- **Amazon** May 2025 – Aug 2025
Software Development Engineer Intern Seattle, US
 - Built a mission-style internal operations console with a **React 18** single-page application and **Java** backend **REST APIs** (Coral, Smithy, Dagger, CBOR); owned features from design through deployment with mentor support.
 - Provisioned **Infrastructure-as-Code** with **AWS CDK** (API Gateway, Lambda, DynamoDB, S3, IAM) and **multi-stage CI/CD**; improved provisioning repeatability and release confidence across regions.
 - Engineered an event-driven triage flow on **ECS Fargate** with **SQS/SNS**, decoupling message processing for reliability; wrote **JUnit/Mockito** unit and integration tests and participated in architecture and code reviews.
- **CampusMesh** Jan 2026 – Present
Software Engineer New York, US
 - Developed production **Node.js** services and **REST APIs** for real-time workflows; troubleshooted defects and shipped fixes through **Git-based CI/CD** across **4 AWS environments** on **Linux** hosts.
 - Deployed serverless components (**Lambda**, **API Gateway**, **S3**, **CloudFront**) with **KMS**, **SSM Parameter Store**, and least-privilege **IAM**; documented runbooks for on-call handoff.
- **New York University (Novel AI Technologies, Inc.)** Aug 2024 – Present
Software Developer New York, US
 - Developed a full-stack analytics platform (**React**, **JavaScript**, **Node.js**, **REST APIs**) deployed via **Docker** on **AWS EC2**; prototyped UI concepts and refined performance based on user feedback.
 - Authored **Python/SQL** ETL jobs into **PostgreSQL**; processed **250K+** records and built reporting views for operations stakeholders.
- **PricewaterhouseCoopers (PwC)** Aug 2021 – Aug 2024
Senior Software Engineer Bengaluru, India
 - Developed and maintained production applications on **Microsoft Azure** using **C#/.NET** and **REST APIs** with **Dynamics 365 CRM**; wrote **SQL Server** stored procedures and queries for regulated workflows.
 - Shipped changes through **Azure DevOps CI/CD**; led code reviews, production troubleshooting, and mentoring that reduced defects by **25%**.

Projects

- **Hospital Management System (Full-Stack SPA)** | *React, JavaScript, Node.js, Express, PostgreSQL, JUnit*
 - Built a single-page **React** web application with **REST APIs** for appointments and patient records; implemented **role-based access control** and **API unit tests** for critical paths.
- **Advanced Expense Tracker (Java Application)** | *Java, JDBC, SQLite, SQL, JUnit, Maven*
 - Architected a modular **Java** desktop application with **JDBC/SQL** persistence, **JUnit** tests, and **MVC/DAO** patterns; profiled hot paths to improve responsiveness under concurrent usage.

Skills

- **Programming Languages:** Java, Python, C#, JavaScript (ES6), TypeScript, SQL (T-SQL), C++
- **Web & Backend:** React, Node.js, Express.js, .NET, REST API, Microservices
- **Databases:** PostgreSQL, SQL Server, MySQL, DynamoDB, MongoDB
- **Cloud & DevOps:** AWS (CDK, EC2, Lambda, ECS, S3, API Gateway, IAM, SQS, SNS), Azure DevOps, Docker, Kubernetes, CI/CD, Git
- **Tools & Platforms:** Linux, npm, pip, Maven, JUnit, Mockito, Postman, Visual Studio
