

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Machine Learning, Deep Learning, Big Data, Computer Architecture, Data Structures

Experience

• CampusMesh

Software Engineer

Jan 2026 – Present

New York, US

- Operated shared **AWS** platform services using **Serverless Framework** with **Lambda**, **API Gateway**, **S3**, and **CloudFront** (CDN) across **4 environments** (local, dev, staging, production).
- Enforced secure deployments with **KMS-managed keys**, **SSM Parameter Store**, and **least-privilege IAM**; partnered with application engineers on release readiness and environment promotion.
- Developed scalable **Node.js microservices** backed by **MySQL (Sequelize)** and **DynamoDB** for real-time academic workflows across messaging, calls, notifications, and profile management.

• Amazon

Software Development Engineer Intern

May 2025 – Aug 2025

Seattle, US

- Provisioned **Infrastructure-as-Code** with **AWS CDK**, deploying **API Gateway**, **Lambda**, **DynamoDB**, **S3**, **IAM**, and **CloudWatch**; reduced provisioning time **70%** with **multi-stage**, **multi-region CI/CD** through **Git**-based build automation.
- Built an event-driven platform on **AWS ECS Fargate**, **SQS**, and **SNS**, improving incident response latency by **50%** and supporting stable biweekly-style release cadences with automated validation.
- Engineered backend services in **Java** with disciplined **unit and integration testing** via **Mockito**; triaged deployment and integration issues across services with product engineering partners.

• New York University (Novel AI Technologies, Inc.)

Software Developer

Aug 2024 – Present

New York, US

- Deployed containerized services with **Docker** on **AWS EC2 (Linux)**; managed networking, access controls, and runtime stability for a **React**, **Node.js**, **REST API** analytics platform.
- Engineered **Python ETL pipelines** into **PostgreSQL**; processed **250K+** records and supported model-output monitoring through **AWS QuickSight** dashboards.
- Deployed **AWS SageMaker** endpoints for ML inference on a health-focused application processing real-time wearable and image data.

• PricewaterhouseCoopers (PwC)

Senior Software Engineer

Aug 2021 – Aug 2024

Bengaluru, India

- Supported a distributed **Microsoft Azure** backend with event-driven processing; shipped changes through **Azure DevOps CI/CD** pipelines with integration monitoring and documented handoffs.
- Deployed an **NLP-based OCR neural model** on Azure to automate structured data extraction, reducing processing time by **75%**.
- Optimized bulk data ingestion with **parallel processing** on **100K-row** feeds, cutting execution from **5 hours to 1 hour**.

Projects

• InviLite (ML Pipeline & Release Automation) | Python, AWS, Kinesis, Lambda, SageMaker, Glue, CloudWatch

- Built cloud-native pipelines (**Kinesis**, **Lambda**, **S3**, **Glue**, **DynamoDB**) ingesting structured and unstructured data into governed **ML training and inference workflows**.
- Automated model-serving paths with **AWS SageMaker** and **Bedrock**, improving triage stability and cutting incident resolution from **1–2 hours to minutes**.

• Advanced Expense Tracker (C++ Application) | C++, OOP, Multithreading, SQLite, JUnit-style testing

- Architected a modular **C++ application** with **OOP design patterns**, concurrent transaction handling, and thread-safe database access for repeatable build-and-test workflows.

Skills

- **Programming Languages:** C++, Python, JavaScript, TypeScript, Java, SQL, Bash
- **Web & Backend:** Node.js, Express.js, React, REST API, Microservices
- **Databases:** PostgreSQL, MySQL, DynamoDB, MongoDB, SQL Server
- **Cloud & DevOps:** AWS (CDK, EC2, S3, CloudFront, Lambda, ECS Fargate, IAM, CloudWatch, SageMaker), Azure (DevOps, Function Apps), Docker, Kubernetes, CI/CD, Git
- **AI/ML Infrastructure:** SageMaker, Bedrock, ML pipelines, Hugging Face, PyTorch
- **Tools & Platforms:** Linux, Visual Studio, Jest, Mockito, Postman, Jenkins

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals

Stanford Machine Learning (Coursera)
