

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Machine Learning, Deep Learning, Big Data, Data Structures

Experience

• New York University (Novel AI Technologies, Inc.)

Aug 2024 – Present

Mobile Software Engineer

New York, US

- Built and maintained a cross-platform **React Native** mobile application for **iOS** and **Android** on an NSF-funded health panel, implementing always-on **real-time wearable activity tracking** and cloud-backed inference workflows.
- Integrated mobile clients with **Python** backend services and **REST APIs**; engineered **ETL pipelines** into **PostgreSQL** with concurrency control for high-fidelity telemetry collection and operational monitoring.
- Implemented **AWS Cognito** authentication, **RBAC**, and row-level security for consent-aware user data handling; partnered with data science stakeholders on model-driven mobile features.
- Designed accessible **React/HTML/CSS** companion interfaces and **WebSocket** real-time updates; conducted code reviews, debugging, and performance tuning across production mobile releases.

• Amazon

May 2025 – Aug 2025

Software Development Engineer Intern

Seattle, US

- Built a **React 18** and **TypeScript** client with **OAuth** and corporate **SSO**, enforcing role-based authorization across routes and actions for a large internal user base.
- Improved UI responsiveness through client-side caching and route-level code splitting; wrote **Jest** and **React Testing Library** tests covering auth flows and data-fetching components.
- Collaborated with senior engineers on design reviews and production defect triage for a secure operations console integrated with backend **REST APIs**.

• CampusMesh

Jan 2026 – Present

Software Engineer

New York, US

- Developed **Node.js REST APIs** and real-time services backing member workflows across messaging, calls, and notifications, with secure deployment across **4 environments** on AWS.
- Supported mobile-adjacent client integrations with **JavaScript/TypeScript** services, **Git**-based releases, and proactive monitoring through structured logging and environment promotion controls.

• PricewaterhouseCoopers (PwC)

Aug 2021 – Aug 2024

Senior Software Engineer

Bengaluru, India

- Delivered accessible **TypeScript/HTML/CSS** UI components for enterprise CRM deployments; established frontend review standards covering usability patterns and test coverage.
- Mentored engineers on software design and troubleshooting; reduced production defects through disciplined code reviews and cross-functional collaboration with product stakeholders.

Projects

• Remote Patient Monitoring (Cross-Platform Mobile App) | React Native, TypeScript, iOS, Android, AWS Cognito, Python

- Developed a cross-platform mobile experience for continuous health telemetry capture, secure login, and panelist-facing dashboards integrated with cloud-hosted analytics.

• Hospital Management System (Mobile-Ready Web App) | React, JavaScript, HTML5, CSS3, Node.js, Jest

- Built a responsive full-stack healthcare application with intuitive UI flows, **role-based access control**, and **unit tests** for critical API and presentation paths.

Skills

- **Mobile Development:** React Native, iOS, Android, Cross-Platform Mobile Architectures, Mobile Application Development
- **Programming Languages:** TypeScript, JavaScript (ES6), Python, HTML5, CSS3, Java, SQL
- **Web & Backend:** React, Node.js, Express.js, REST API, Microservices
- **Auth & Privacy:** OAuth, AWS Cognito, RBAC, Authorization, Privacy Controls, IAM
- **Cloud & DevOps:** AWS (Amplify, Lambda, Cognito, API Gateway, S3, EC2), Docker, CI/CD, Git
- **Tools & Practices:** Jest, React Testing Library, Postman, Visual Studio, Usability Testing, Code Reviews

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals

Stanford Machine Learning (Coursera)
