Hiring Manager

Wildfire Defense Systems, Inc.

Post Falls, ID

Dear Hiring Manager,

I'm Ajay Venkatesh, completing an M.S. in Computer Engineering at NYU, with production software experience at PwC in Bengaluru, a summer SDE internship at Amazon, and ongoing on-campus work at NYU's Novel AI Technologies. I'm applying for the Software Developer I role, where I'd help create, maintain, and deploy applications that support internal teams and external partners in the property and casualty insurance space.

At PwC, I developed and maintained applications on **Microsoft Azure** using **C#/.NET**, integrating with **Dynamics 365 CRM** through **REST APIs** over **SQL Server**. I wrote **SQL queries and stored procedures**, troubleshooted defects with senior guidance, participated in **code reviews** and **Agile** planning, and shipped changes through **Azure DevOps CI/CD** pipelines in a regulated environment.

At Amazon, I built a **React** frontend and backend **REST APIs** with **unit tests**, **Git-driven CI/CD**, and disciplined review feedback on an internal operations console. At NYU, I developed an **insurance analytics platform** in **React** and **JavaScript** for underwriting and risk workflows, a broker portal with external insurer integrations, and **PostgreSQL** reporting jobs for operations stakeholders.

My stack includes **C#**, **.NET**, **JavaScript**, **React**, **SQL**, **Java**, **Python**, **Azure**, **AWS**, **Docker**, **Git**, and **Visual Studio**. **Swift** is an area I have not led in production yet, though I have contributed to **iOS** and **Android** delivery on a cross-functional mobile product and am comfortable ramping on new frameworks with mentor support.

What pulls me toward Wildfire Defense Systems is the chance to build software that supports insurers and communities facing real wildfire risk. I care about clean, documented code, dependable releases, and collaborating with both technical and business stakeholders to improve products based on user feedback.

I'd welcome the chance to discuss further. Thanks for considering my application.

Sincerely,

Ajay Venkatesh
