

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Data Structures, Machine Learning, Big Data, Advanced Java

Experience

- Amazon

May 2025 – Aug 2025

Software Development Engineer Intern

Seattle, US

– Built an internal operations **web application** in **React** and **TypeScript** integrated with **Java** backend **RESTful APIs**; delivered role-scoped workflows for operations teams with **OAuth** and least-privilege access controls.

– Engineered backend **microservices** on **AWS ECS Fargate** with **AWS CDK** and **multi-stage CI/CD**; improved reliability with structured logging, automated tests, and peer **code reviews** before production rollout.

– Partnered with senior engineers and cross-functional stakeholders to break down features, debug cross-tier defects, and iterate on UX for high-volume operational use cases.
- New York University (Novel AI Technologies, Inc.)

Aug 2024 – Present

Software Developer

New York, US

– Developed an analytics **web platform** (**React**, **TypeScript**, **JavaScript**, **Node.js**) with admin dashboards, **RBAC**, and row-level security for policy-driven client workflows deployed on **Docker/AWS EC2**.

– Built backend **RESTful APIs** and **Python/SQL** pipelines into **PostgreSQL** powering telemetry-style reporting surfaces; integrated **WebSocket** updates for real-time operational visibility.

– Collaborated with product, analytics, and non-engineering partners on requirements, rollout support, and production troubleshooting across frontend and service layers.
- CampusMesh

Jan 2026 – Present

Software Engineer

New York, US

– Shipped **TypeScript/Node.js** microservices and **REST APIs** on **AWS** (**Lambda**, **API Gateway**, **S3**) across **4 environments**; improved observability with structured logging and **Kubernetes**-style release patterns.

– Delivered workflow automation and notification features through **Git**-based **Agile** delivery with clear documentation for cross-team handoffs.
- PricewaterhouseCoopers (PwC)

Aug 2021 – Aug 2024

Senior Software Engineer

Bengaluru, India

– Delivered scalable **web applications** on **Microsoft Azure** with **TypeScript/JavaScript** frontends and **Java/SQL Server** backends; participated in **Agile** ceremonies, **code reviews**, and **Azure DevOps CI/CD** releases.

Projects

- Hospital Management System (Full-Stack Web Application) | React, TypeScript, JavaScript, Node.js, RESTful APIs, Jest, PostgreSQL

– Built a responsive **React** and **TypeScript** UI with backend **RESTful APIs** and **role-based access control**; wrote **Jest** tests and documented modules for collaborative platform development.
- Task Management Dashboard (Operational Web SPA) | React, TypeScript, JavaScript, REST APIs, Git, Agile

– Crafted workflow-focused **frontend** experiences with **React** and **TypeScript**; integrated service APIs and managed delivery through **Git**-based review workflows.

Skills

- Programming Languages:

TypeScript, JavaScript (ES6), Python, Java, Go, SQL
- Web & Backend:

React, Node.js, RESTful APIs, Microservices, API Design
- Cloud & DevOps:

AWS (CDK, ECS, Lambda, API Gateway, S3), Microsoft Azure, Docker, Kubernetes, CI/CD, Git
- Databases:

PostgreSQL, MySQL, SQL Server, DynamoDB, MongoDB
- Collaboration:

Agile Development, Code Review, Jest, Mockito, Debugging

Certifications

AWS Cloud Practitioner

Stanford Machine Learning (Coursera)

Azure Data Fundamentals
