

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: Machine Learning, Deep Learning, Big Data, System Design, Data Structures

Experience

- **Amazon** May 2025 – Aug 2025
Software Development Engineer Intern Seattle, US
 - Built an **AI-powered application** with a **RAG pipeline** and **agentic workflow** that retrieves operational logs and generates context-aware remediation steps, automating manual incident triage for operations teams.
 - Implemented a **Model Context Protocol (MCP)** server for tool-augmented **LLM** retrieval; integrated with production **REST APIs** on **AWS ECS Fargate** and supported monitoring and issue remediation through structured logging and tests.
 - Shipped maintainable backend services with **unit/integration testing** and **CI/CD** via **AWS CDK**; partnered with senior engineers to evaluate model behavior and refine **prompt** patterns before rollout.
- **CampusMesh** Jan 2026 – Present
AI Software Engineer New York, US
 - Developed **CampusIQ**, a conversational **AI agent** with **LLM-based RAG pipelines**, **embedding-based semantic search**, and structured indexing that improved contextual accuracy by **30%** across student workflows.
 - Automated manual coordination through **AI-powered** features on **Node.js/TypeScript REST APIs** deployed on **AWS** (Lambda, API Gateway, S3) across **4 environments** with **Git**-based reviews and iterative evaluation.
- **New York University (Novel AI Technologies, Inc.)** Aug 2024 – Present
AI Software Engineer New York, US
 - Integrated **LLM-based document analysis (GPT-4 + LangChain)** into a financial analytics platform (**React, Node.js, REST APIs**) with **Stripe** billing and **RBAC**, replacing manual underwriting review for lending-adjacent operations teams.
 - Built **Python ETL pipelines** into **PostgreSQL** and **AWS QuickSight** dashboards for internal stakeholders; deployed services with **Docker** on **EC2** and troubleshooted production AI integration issues with cross-functional partners.
- **PricewaterhouseCoopers (PwC)** Aug 2021 – Aug 2024
Senior Software Engineer Bengaluru, India
 - Automated manual document workflows with an **NLP-powered OCR pipeline** on **Azure**; integrated a distributed backend with **Microsoft Dynamics CRM** and **SQL Server**, reducing processing time by **75%** through responsible production ML deployment.

Projects

- **InviLite (AI Operations & Evaluation Platform)** | *Python, AWS, Bedrock, FAISS, LangChain, RAG*
 - Built a **RAG copilot** (SVM + FAISS + **Bedrock LLM**) with automated **evaluation harnesses**, lifting root-cause classification accuracy from **56% to 92%** and cutting incident resolution from **1–2 hours to minutes**.
- **RoBERTa Fine-Tuning with Custom LoRA** | *Python, PyTorch, Hugging Face, PEFT, Prompt Engineering*
 - Architected an **LLM fine-tuning** pipeline with custom **LoRA**; ran hyperparameter sweeps and validation-based **evaluation methods**, achieving **83.45%** accuracy with under **1M trainable parameters**.

Skills

- **Programming Languages:** Python, TypeScript, JavaScript (ES6), Java, SQL
- **AI & LLM Systems:** AI-Powered Application Development, Large Language Models, Prompt Engineering, RAG, LangChain, FAISS, Agentic Frameworks, MCP, Embeddings, Hugging Face
- **Backend & APIs:** REST APIs, Node.js, React, Microservices, API Integration
- **Cloud & DevOps:** AWS (Lambda, Bedrock, ECS, S3, CDK, QuickSight), Azure, Docker, CI/CD
- **Engineering Practices:** Software Engineering Fundamentals, Version Control (Git), Unit Testing, Integration Testing, Mockito, Code Review

Certifications

AWS Cloud Practitioner

Stanford Machine Learning (Coursera)

Azure Data Fundamentals
