

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Data Structures, Machine Learning, Big Data, Advanced Java

Experience

- New York University (Novel AI Technologies, Inc.)

Software Developer

– Developed a SaaS-style **insurance analytics web application (TypeScript, React, Node.js, REST APIs)** for P&C underwriting workflows; delivered new features and maintained existing functionality for insurer and broker users.

– Built a broker portal with **HTTP/REST** integrations to external insurer systems, **RBAC**, and real-time status updates; authored **SQL** ETL jobs into **PostgreSQL** processing **250K+** records across **6 clients**.

– Debugged production issues, participated in design and code reviews, and documented module behavior for maintainable handoff across the team.

Aug 2024 – Present
New York, US
- PricewaterhouseCoopers (PwC)

Senior Software Engineer

– Developed full-stack **web applications** on Microsoft **Azure** using **C#/.NET** and **REST API** integrations with **Dynamics 365 CRM**; wrote **SQL queries and stored procedures** over **SQL Server** in a regulated enterprise environment.

– Built **Angular** and **TypeScript** frontends with **HTML/CSS**; contributed to automated test suites, assessed change impact in code reviews, and reduced production defects by **25%**.

Aug 2021 – Aug 2024
Bengaluru, India
- Amazon

Software Development Engineer Intern

– Engineered backend **REST APIs** in **Java** with **unit/integration tests**; built a **React** UI integrated via **HTTP** services and supported releases through **multi-stage CI/CD** with production monitoring via **CloudWatch**.

– Resolved application errors across a **distributed** event-driven platform (**ECS Fargate, SQS, SNS**); participated in technical design discussions and incorporated review feedback before deployment.

May 2025 – Aug 2025
Seattle, US
- CampusMesh

Software Engineer

– Shipped full-stack changes to **Node.js REST APIs** and **MySQL** stores through **Git** pull-request workflows; troubleshooted performance issues across **4 environments** with structured logging and operational runbooks.

Jan 2026 – Present
New York, US

Projects

- Task Management Dashboard (Angular Web Application) | Angular, TypeScript, HTML, CSS, Jest, Git, REST APIs

– Built an **Angular** single-page **web application** with **TypeScript**, responsive **HTML/CSS** layouts, and **Jest** unit tests across components and services; validated APIs with **Postman**.
- Hospital Management System (Full-Stack Web Application) | TypeScript, React, Node.js, MVC, SQL, HTTP, REST APIs

– Delivered a client-server **web application** using **MVC** patterns, **REST APIs**, and **SQL** persistence; wrote automated tests for critical service paths and documented designs for team maintainability.

Skills

- Programming Languages: TypeScript, JavaScript (ES6), Java, C#, Python, SQL (T-SQL)

• Web & Backend: Angular, HTML, CSS, MVC, REST APIs, HTTP, .NET, React, Node.js, Distributed Systems

• Databases: SQL Server, PostgreSQL, MySQL, DynamoDB

• Testing & Tools: Jest, Mockito, Postman, Git, DataDog, Visual Studio, Cursor

• Cloud & DevOps: Azure (DevOps), AWS (CloudWatch, CDK, EC2), Docker, CI/CD

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals

Stanford Machine Learning (Coursera)
