

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: Computer Architecture, System Design, Data Structures, Machine Learning, Big Data

Experience

- **PricewaterhouseCoopers (PwC)** Aug 2021 – Aug 2024
Senior Software Engineer
Bengaluru, India
 - Architected and maintained a **distributed** backend on **Microsoft Azure** with event-driven processing and fault-tolerant retries; analyzed production failures, mitigated defects, and shipped fixes through **Azure DevOps CI/CD**.
 - Mentored junior engineers on **software engineering principles**, code reviews, and testing discipline in a small delivery team; reduced production bugs by **25%**.
 - Optimized parallel batch ingestion on **100K-row** feeds from **5 hours to 1 hour** through targeted troubleshooting and performance-focused refactors.
- **Amazon** May 2025 – Aug 2025
Software Development Engineer Intern
Seattle, US
 - Developed backend services in **Java** alongside senior engineers; presented **system design** for approval and built **automated unit/integration tests** with **Mockito** before multi-stage release.
 - Diagnosed cross-service defects on an event-driven platform (**ECS Fargate, SQS, SNS**); analyzed test failures, incorporated review feedback, and improved operational response latency by **50%**.
- **New York University (Novel AI Technologies, Inc.)** Aug 2024 – Present
Software Developer
New York, US
 - Built and maintained **Python** ETL pipelines with concurrency control into **PostgreSQL**; troubleshoot integration breaks and validated outputs for **250K+** records with operations partners.
 - Deployed services on **Docker/Linux EC2**; collaborated in a small team to deliver enhancements from stakeholder feedback with documented handoffs.
- **CampusMesh** Jan 2026 – Present
Software Engineer
New York, US
 - Maintained **Node.js** microservices across **4 environments** on **Linux/AWS**; troubleshoot production integration defects and documented runbooks for cross-team support.

Projects

- **Advanced Expense Tracker (C/C++ Feature Development)** | *C, C++, STL, Multithreading, Automated Testing, Visual Studio*
 - Developed and maintained modular **C/C++** features with **OOP, STL** collections, and **MVC/DAO** patterns; built automated validation tests and debugger workflows to resolve memory and concurrency defects.
- **Advanced Expense Tracker (Python Application)** | *Python, OOP, Multithreading, SQLite, Unit Testing*
 - Architected a **Python** desktop application with thread-safe persistence and synchronized updates; applied **software engineering principles** for maintainable module design and local test coverage.
- **InviLite (Distributed Monitoring Pipeline)** | *Python, AWS Lambda, Kinesis, CloudWatch, Linux*
 - Built ingestion and triage automation for operational telemetry; added monitoring hooks and analyzed failure patterns, cutting incident resolution from **1–2 hours to minutes**.

Skills

- **Programming Languages:** C, C++, Python, Java, JavaScript, SQL
- **Systems & Platforms:** Linux, UNIX, Distributed Systems, Computer Architecture, Docker
- **Software Engineering:** Software Engineering Principles, Software Troubleshooting, Automated Testing, Code Reviews, CI/CD
- **Databases:** PostgreSQL, SQLite, SQL Server, MySQL, DynamoDB
- **Cloud & Tools:** AWS (EC2, Lambda, ECS, SQS, SNS, CloudWatch), Git, Visual Studio, Postman

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals

Stanford Machine Learning (Coursera)
