

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Machine Learning, Big Data, Data Structures, Computer Architecture

Experience

- **Amazon** May 2025 – Aug 2025
Software Development Engineer Intern
Seattle, US
 - Provisioned scalable cloud infrastructure with **Infrastructure as Code** using **AWS CDK** on **ECS Fargate**, **Lambda**, **DynamoDB**, and **S3**; supported **multi-stage CI/CD pipelines** with monitoring via **CloudWatch** and structured logging.
 - Built an **event-driven architecture** on **SQS/SNS** with backend **RESTful APIs**; wrote **unit and integration tests** and troubleshoot cross-service performance and reliability issues before production rollout.
 - Collaborated with applied ML and engineering partners on operational tooling integrated with production services; participated in code reviews across the **software development lifecycle**.
- **New York University (Novel AI Technologies, Inc.)** Aug 2024 – Present
Software Developer
New York, US
 - Engineered **Python/SQL data pipelines** into **PostgreSQL** with validation checks for data quality and integrity; powered **AWS QuickSight** dashboards for internal analytics consumers.
 - Deployed **ML inference services** and containerized workloads with **Docker** on **AWS EC2**; built **RESTful APIs (Node.js, TypeScript)** connecting web applications to cloud-backed model and analytics endpoints.
 - Partnered with research and product teams on requirements, testing, and production support for multi-tenant cloud services.
- **CampusMesh** Jan 2026 – Present
Software Engineer
New York, US
 - Maintained **TypeScript/Node.js** services and **RESTful APIs** on **AWS (Lambda, API Gateway, S3)** across **4 environments**; used **Kubernetes**-style release patterns with **Docker** and environment promotion controls.
 - Improved platform reliability with structured logging and cost-aware configuration; documented integration contracts for web and backend application teams.
- **PricewaterhouseCoopers (PwC)** Aug 2021 – Aug 2024
Senior Software Engineer
Bengaluru, India
 - Developed distributed cloud services on **Microsoft Azure** with event-driven batch processing over **SQL Server**; shipped through **Azure DevOps CI/CD** and led code reviews on maintainable **Python/Java** services.

Projects

- **InviLite (Cloud Data & ML Platform)** | *Python, AWS, Lambda, S3, Glue, SageMaker, Kinesis*
 - Architected governed **data pipelines** (Kinesis, Lambda, S3, Glue, DynamoDB) with **ML inference** integration; built **REST APIs** and automated evaluation workflows for production reliability.
- **Flight Delay Prediction (Distributed Data Pipeline)** | *Python, PySpark, SQL, HDFS, REST APIs*
 - Built scalable **PySpark** ETL jobs over large datasets with **SQL**-based feature engineering; exposed pipeline outputs through backend **REST APIs** with validation and repeatable test runs.

Skills

- **Programming Languages:** Python, TypeScript, Go, Java, JavaScript, SQL
- **Cloud & IaC:** Google Cloud Platform (GCP), AWS (CDK, ECS, Lambda, S3, CloudWatch), Infrastructure as Code, Docker, Kubernetes
- **Data & ML:** Data Engineering Workflows, Data Pipelines, ML Inference Services, PySpark, PostgreSQL
- **APIs & Architecture:** RESTful APIs, Event-Driven Architectures, Kafka, Microservices
- **Delivery:** CI/CD Pipelines, GitLab CI/CD, Git, Software Development Lifecycle, Unit Testing, Integration Testing

Certifications

AWS Cloud Practitioner

Stanford Machine Learning (Coursera)

Azure Data Fundamentals
