Hiring Manager

Epic for Kids

Dear Hiring Manager,

I'm Ajay Venkatesh, completing an M.S. in Computer Engineering at NYU, with production software experience at PwC in Bengaluru, a summer SDE internship at Amazon, and ongoing on-campus engineering work at NYU's Novel AI Technologies. I'm applying for the Software Engineer role, where I'd implement scoped full-stack features, fix bugs across the stack, write tests, and grow through pairing and code reviews with senior engineers.

At CampusMesh, I ship backend changes against **MySQL** through **Git** pull-request workflows, reproduce production bugs, and keep tests passing on the areas I touch. I participate in code reviews as both author and reviewer and document runbooks and onboarding notes for the modules I maintain.

At Amazon, I delivered **React** and **TypeScript** UI features and backend **REST API** changes with mentor support, wrote **unit and integration tests**, and incorporated review feedback before release. At PwC, I built **Angular** and **TypeScript** frontends with **HTML/CSS** and worked on **SQL Server** backends with relational **SQL** queries. In projects, I built an **Angular** SPA with **Jest** tests and a full-stack web app with documented modules and API test coverage.

My stack includes **Angular**, **TypeScript**, **JavaScript**, **HTML**, **CSS**, **PHP**, **Go**, **MySQL**, **SQL**, **Git**, **Node.js**, **Cursor**, and **GitHub Copilot**. **Symfony**, **Doctrine ORM**, and production **Go** services are areas I have not shipped end-to-end yet, but my **Angular/TypeScript** frontend work, **MySQL/SQL** backend experience, and track record learning new frameworks quickly give me a strong base to ramp on your stack.

What draws me to Epic for Kids is the chance to build software that supports children and families while learning from senior engineers in a collaborative, feedback-friendly environment. I ask questions early, communicate clearly in reviews and documentation, and take ownership of every line I commit.

I'd welcome the chance to discuss further. Thanks for considering my application.

Sincerely,

Ajay Venkatesh
