

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: Computer Architecture, System Design, Data Structures, Machine Learning, Big Data

Experience

- **PricewaterhouseCoopers (PwC)** Aug 2021 – Aug 2024
Senior Software Engineer Bengaluru, India
 - Developed and maintained production software on **Microsoft Azure** and **Windows**; diagnosed defects with **Visual Studio** debugging tools and shipped fixes through **Azure DevOps CI/CD** with structured **software testing patterns**.
 - Improved ingestion **performance** with **parallel processing** and **concurrency** on **100K-row** feeds, cutting runtime from **5 hours to 1 hour**; led code reviews and mentored engineers on robust design, reducing production bugs by **25%**.
- **Amazon** May 2025 – Aug 2025
Software Development Engineer Intern Seattle, US
 - Engineered backend services in **Java** with **REST APIs** and **CBOR** serialization alongside senior engineers; applied low-level design patterns and cut backend execution time by **35%** through targeted **performance analysis**.
 - Diagnosed cross-service defects and wrote **unit/integration tests** with **Mockito**; contributed to secure service design with **OAuth**, least-privilege **IAM**, and security-minded code reviews.
- **New York University (Novel AI Technologies, Inc.)** Aug 2024 – Present
Software Developer New York, US
 - Built data pipelines with **concurrency control**, locking, and thread-safe writes into **PostgreSQL**; troubleshoot integration defects and validated outputs for **250K+** records across analytics workloads.
 - Deployed a multi-tenant platform on **Docker/AWS EC2** with **RBAC** and row-level security boundaries for insurer and broker users.
- **CampusMesh** Jan 2026 – Present
Software Engineer New York, US
 - Maintained **Node.js** services across **4 environments**; troubleshoot production issues and enforced **computer security fundamentals** via **KMS**, **SSM Parameter Store**, and least-privilege **IAM** on **Linux** and cloud hosts.

Projects

- **Advanced Expense Tracker (C/C++ Framework)** | *C++, C, STL, Multithreading, SQLite, Visual Studio, Windows*
 - Developed and maintained a modular **C++** application on **Windows** using **Visual Studio**; applied **OOP**, **STL** collections, and **MVC/DAO** patterns over **SQLite** persistence with synchronized blocks for **thread-safe** updates.
 - Implemented local validation tests and used debugger/profiler workflows to resolve memory and concurrency defects during feature enhancements.
- **Advanced Expense Tracker (Java Desktop Application)** | *Java, Multithreading, JDBC, JUnit, Software Testing Patterns*
 - Built a desktop application with **multithreading** and synchronized **JDBC** updates; wrote **JUnit** tests covering core business logic and regression paths.
- **Hospital Management System (Secure Full-Stack Application)** | *React, Node.js, REST APIs, Unit Testing, RBAC*
 - Delivered **REST APIs** with **role-based access control**; wrote API **unit tests** for authentication and authorization on critical service endpoints.

Skills

- **Programming Languages:** C++, C, Java, Python, JavaScript, SQL
- **Systems & Concurrency:** Operating Systems Concepts, Windows Internals, Threading, Concurrency, Computer Architecture
- **Software Engineering:** Software Testing Patterns, Debugging, Performance Analysis, Code Reviews, CI/CD
- **Security:** Computer Security Fundamentals, OAuth, RBAC, IAM, Least-Privilege Access
- **Databases:** SQLite, PostgreSQL, SQL Server, MySQL, DynamoDB
- **Tools & Platforms:** Visual Studio, Git, Linux, Windows, Postman, Docker, AWS

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals

Stanford Machine Learning (Coursera)
