

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Data Structures, Machine Learning, Big Data, Advanced Java

Experience

- New York University (Novel AI Technologies, Inc.)** Aug 2024 – Present
Software Developer
– Developed and released a large-scale **web application (React, TypeScript, JavaScript, Node.js)** helping small businesses manage operations; implemented **Stripe** payments, **RBAC**, and multi-tenant workflows across **6 clients**.
– Built a cross-platform **React Native** app for **iOS** and **Android** with backend **REST APIs** and **PostgreSQL**; improved reliability and performance of telemetry and reporting features used by operations partners.
– Integrated **AI/ML APIs** and **LLM**-powered document workflows (**LangChain, GPT-4**) where they added clear user value; authored **SQL** pipelines processing **250K+** records into **PostgreSQL**.
- CampusMesh** Jan 2026 – Present
Software Engineer
– Developed **microservices** on **AWS (Lambda, API Gateway, S3)** across **4 environments**; shipped customer-facing **AI features** via **LLM RAG** pipelines with embedding-based search, improving assistant accuracy by **30%**.
– Improved backend scalability and security with least-privilege **IAM**, structured logging, and **Kubernetes**-style release patterns; collaborated in code reviews on **TypeScript/Node.js** services backed by **PostgreSQL/MySQL**.
- Amazon** May 2025 – Aug 2025
Software Development Engineer Intern
– Shipped **React** and **TypeScript** UI components integrated with **Java** backend **microservices** and **REST APIs**; used **Protocol Buffers/CBOR** serialization and wrote tests before **AWS CDK** multi-stage rollout.
– Built production **LLM** tooling with **RAG** and an agentic workflow for operational users; provisioned **ECS Fargate** infrastructure and improved backend performance by **35%** through targeted optimization.
- PricewaterhouseCoopers (PwC)** Aug 2021 – Aug 2024
Senior Software Engineer
– Delivered enterprise **web applications** on **Microsoft Azure** with **TypeScript/JavaScript** frontends and **SQL Server**; mentored engineers and reduced production defects by **25%** through disciplined reviews.

Projects

- Remote Health Panel (Cross-Platform Mobile App)** | *React Native, TypeScript, iOS, Android, REST APIs, AWS*
– Built a **React Native** mobile experience with secure auth and real-time dashboards; integrated cloud-backed analytics APIs for user-facing health and activity workflows.
- Hospital Management System (Full-Stack Web Application)** | *React, Redux, TypeScript, JavaScript, Node.js, Jest, PostgreSQL*
– Crafted intuitive **frontend** flows with **React, Redux**, and responsive layouts; wrote **Jest** tests and backend APIs with relational **PostgreSQL** persistence.

Skills

- Programming Languages:** TypeScript, JavaScript (ES6), Java, Kotlin, Python, SQL
- Web & Mobile:** React, Redux, React Native, Microservices, Software Development
- AI & APIs:** AI/ML APIs, Large Language Models (LLMs), LangChain, RAG, Protocol Buffers
- Databases:** PostgreSQL, MySQL, SQL Server, DynamoDB, MongoDB
- Cloud & DevOps:** AWS (CDK, ECS, Lambda, API Gateway, S3, IAM), Kubernetes, Terraform, Docker, CI/CD, Git

Certifications

AWS Cloud Practitioner

Stanford Machine Learning (Coursera)

Azure Data Fundamentals
