

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Computer Architecture, Data Structures, Machine Learning, Big Data

Experience

- Amazon

May 2025 – Aug 2025

Software Development Engineer Intern

Seattle, US

- Designed security-critical access controls for an internal operations console with **role-based access** for **4+ roles** via **OAuth**, **Midway SSO**, and **HELIS**; presented auth design for review before multi-region production rollout.
 - Provisioned **Infrastructure-as-Code** with **AWS CDK**, least-privilege **IAM**, **API Gateway**, **Lambda**, and **DynamoDB**; integrated automated **unit/integration tests** into **multi-stage CI/CD** pipelines to catch defects before release.
 - Engineered **distributed** backend **microservices** with **REST APIs**; participated in security-minded **code reviews** and reproduced cross-service defects with engineering partners before deployment.
- CampusMesh

Jan 2026 – Present

Software Engineer

New York, US

- Deployed **serverless microservices** on **AWS (Lambda, API Gateway, S3, CloudFront)** across **4 environments**; enforced secure defaults with **KMS-managed keys**, **SSM Parameter Store**, least-privilege **IAM**, and a **JWT custom authorizer**.
 - Built reusable deployment patterns and documented secure service runbooks so product engineers could ship through **Git**-based workflows with consistent access and configuration controls.
- New York University (Novel AI Technologies, Inc.)

Aug 2024 – Present

Software Developer

New York, US

- Developed a financial analytics platform (**React**, **Node.js**, **REST APIs**) with **Stripe** billing, **RBAC**, and row-level security across multi-tenant fintech-style client workflows deployed on **Docker/AWS EC2**.
 - Validated tenant isolation and data-access boundaries in **PostgreSQL**; troubleshooted auth and integration defects with product stakeholders in a regulated services environment.
- PricewaterhouseCoopers (PwC)

Aug 2021 – Aug 2024

Senior Software Engineer

Bengaluru, India

- Delivered production **distributed systems** on **Microsoft Azure** with fault-tolerant processing over **SQL Server**; diagnosed multi-service incidents via logs and metrics and shipped fixes through **Azure DevOps CI/CD** in a regulated healthcare environment.

Projects

- Hospital Management System (Secure Full-Stack Application) | Node.js, Express, MongoDB, RBAC, Jest, REST APIs

- Built a full-stack platform with **role-based access control** and backend **REST APIs**; wrote **Jest** tests covering authentication and authorization paths on security-sensitive endpoints.
- InviLite (Monitored Ingestion Pipeline) | Python, AWS, Lambda, S3, CloudWatch, CI/CD

- Architected a governed **Python** ingestion workflow on **AWS** with automated validation checks and monitoring hooks before promoting data to downstream consumers.

Skills

- **Programming Languages:** Python, Java, JavaScript, TypeScript, SQL, C++
- **Platforms & Architecture:** Distributed Systems, Microservices, REST APIs, OAuth, RBAC, IAM, KMS
- **Cloud & DevOps:** AWS (CDK, Lambda, ECS, API Gateway, S3, IAM), Docker, Kubernetes, Terraform, CI/CD Pipeline, Git, Linux
- **Databases:** PostgreSQL, MySQL, DynamoDB, MongoDB, SQL Server
- **Testing & Delivery:** Unit Testing, Integration Testing, Mockito, Jest, Code Review

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals

Stanford Machine Learning (Coursera)
