

Education

New York University, New York, NY

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Data Structures, Machine Learning, Big Data, Advanced Java

Aug 2024 – May 2026

Experience

- New York University (Novel AI Technologies, Inc.)

Software Developer

– Built and maintained a full-stack web platform (React, TypeScript, JavaScript, HTML, CSS, Node.js, Express) with REST APIs and PostgreSQL; shipped responsive UI flows and backend endpoints deployed via Docker on AWS EC2.

– Developed Python data services and SQL pipelines powering analytics dashboards for internal users; wrote validation checks and documented API contracts for cross-team integration.

– Partnered with product and research stakeholders to fix bugs, iterate on UX, and support AI-adjacent features used by non-engineering teams in production.

Aug 2024 – Present

New York, US

• Amazon

Software Development Engineer Intern

– Shipped React and TypeScript UI components integrated with backend REST APIs; improved performance with client-side caching and wrote tests before multi-stage CI/CD release on AWS CDK.

– Engineered backend services in Java with clear module boundaries; participated in code reviews, debugged integration defects, and incorporated feedback to keep platform code maintainable and scalable.

May 2025 – Aug 2025

Seattle, US

• CampusMesh

Software Engineer

– Developed TypeScript/Node.js platform services and REST APIs on AWS (Lambda, API Gateway, S3) across 4 environments; delivered developer-facing workflow improvements through Git pull-request workflows with peer reviews.

– Supported AI engineer use cases via LLM retrieval pipelines and structured logging; troubleshooted production bugs and documented integration behavior for faster onboarding.

Jan 2026 – Present

New York, US

• PricewaterhouseCoopers (PwC)

Senior Software Engineer

– Delivered enterprise web applications with TypeScript/JavaScript frontends on Microsoft Azure; led code reviews and mentored engineers on testing discipline and maintainable full-stack design.

Aug 2021 – Aug 2024

Bengaluru, India
- ## Projects
- Hospital Management System (Full-Stack Web Application) | React, TypeScript, JavaScript, HTML, CSS, Node.js, Express, REST APIs, Jest

– Built responsive React UI flows with TypeScript and an Express backend; integrated REST APIs, wrote Jest tests, and managed changes through Git-based review workflows.

• Advanced Expense Tracker (Python Application) | Python, unittest, SQLite, MVC, Git

– Architected a modular Python application with MVC/DAO separation, unittest coverage, and thread-safe persistence; published source on GitHub with clear module boundaries for collaborative development.
- ## Skills
- Programming Languages: Python, TypeScript, JavaScript (ES6), Go, Java, SQL

• Frontend: React, HTML, CSS, JavaScript Frameworks, Responsive Design

• Backend & APIs: Node.js, Express, REST APIs, Pydantic, Microservices

• Cloud & DevOps: AWS (Lambda, EC2, S3, API Gateway, CDK), Docker, CI/CD, Linux

• Engineering Practices: Git, Version Control, Unit Testing, Integration Testing, Jest, Mockito, Code Review
- ## Certifications
- AWS Cloud Practitioner

Stanford Machine Learning (Coursera)

Azure Data Fundamentals
