Hiring Manager

Skydio

San Mateo, California

Dear Hiring Manager,

I'm Ajay Venkatesh, completing an M.S. in Computer Engineering at NYU, with production software experience at PwC in Bengaluru, a summer SDE internship at Amazon, and ongoing on-campus work at NYU's Novel AI Technologies. I'm applying for the Software Engineer, Full Stack role, where I'd help build and maintain backend services and customer-facing experiences in Skydio cloud alongside product and field partners.

At Amazon, I built a customer-facing **React 18** and **TypeScript** UI with optimized API integration and caching, and engineered **Java** backend services with **REST APIs** across a multi-tier architecture. I provisioned **AWS CDK** infrastructure with **API Gateway**, **Lambda**, **DynamoDB**, and **IAM**, and shipped through **multi-stage CI/CD**, which maps closely to improving performance and reliability from the browser through service interactions.

At CampusMesh, I develop **Node.js** backend services and **REST APIs** backed by **MySQL** and **DynamoDB**, deployed on **AWS** across multiple environments. At NYU, I built a full-stack analytics platform in **React** and **Node.js** on **Docker/EC2** with real-time **WebSocket** updates and external integrations for operational users.

My stack includes **TypeScript**, **JavaScript**, **React**, **Node.js**, **Java**, **Python**, **GraphQL**, **AWS**, **Kubernetes**, **Docker**, **Git**, and **Linux**. **Temporal** and commercial **autonomy/robotics** production systems are areas I have not shipped in yet, but my full-stack delivery background and interest in real-time, field-driven products give me a strong base to ramp quickly with team support.

What draws me to Skydio is the chance to build software that powers autonomous flight in real operations, where UI quality, API reliability, and fast iteration from field feedback matter. I care about dependable releases and partnering across engineering disciplines to improve products used in high-stakes environments.

I'd welcome the chance to discuss further. Thanks for considering my application.

Sincerely,

Ajay Venkatesh
